□□□□□-□□ □□□□□□□□ □□□□□□□□□□:

- COVID-19 has rapidly affected the sale in the automotive industry, thus hampering the growth of the global vehicle for disabled market as there is no demand.
- This market was expected to register a significant growth in the near future, but due to COVID-19, the market is expected to decline.
- Sales play a major role in the vehicle sector and industries are facing slower production and low demand due to lockdown, which eventually led to the decrease in the sales of the top companies.
- Many of these companies have stopped their production as there is no demand in the market and lack of income among consumers.

These vehicles help in easy accessibility and mobility solutions, thus supplementing the growth of the global market. However, high cost and lack of medical reimbursement hamper the growth of the market. On the other hand, improvements in healthcare infrastructure and equality to disabled people provide lucrative opportunities for the growth of the global vehicle for disabled market.

Continuous development in the health infrastructure and technological sector has provided equality to disabled people. Vehicles providing ease of mobility with self-adjustments of size and full safety create the demand for such vehicles and lead to the growth of the market.
