Electronic products are defined as products that have an electronic circuit that during operation can generate or emit a physical field of radiation in devices.

The main types of electronic products are audio and video equipment, semiconductor, and other electronic components. Devices that reproduce, record, or process sound are referred to as audio equipment. Examples of audio equipment are microphones, radio receivers, AV receivers, CD players, tape recorders, amplifiers, mixing consoles, effects units, headphones, and speakers. The equipment is operated through online and offline modes. The various sales channels include OEM and aftermarket that are used by B2B and B2C end users.
