Printing inks are liquids that contain pigments or dyes that are used to produce images, text, and designs. They are widely used in letterpress and lithographic printing. Printing inks consist of a pigment or pigments of the required color mixed with oil or varnish. For example, black ink made from carbon black is mixed with thick linseed oil or similar oil, often with rosin oil to which rosin varnish is added. Inkjet inks consist of a base carrier such as water, oil, or a solvent, and colorants such as dyes or pigments, along with small amounts of chemical additives to provide some unique characteristics.
