# Driving Business Success through Data Governance: Paul Hooper to Keynote at 10th Annual WWDVC

*DVA Announces Paul Hooper's Keynote Session at WWDVC 2024 to Elevate Organizational Data Governance Initiatives: Promises Actionable Insights to Attendees*

STOWE, VERMONT, UNITED STATES, March 19, 2024 /EINPresswire.com/ -- In the rapidly evolving landscape of modern business, effective [data governance](#) has become a critical component of organizational success.

DVA announced the inclusion of a session to address the critical topic of Data Governance as a Keynote session at the upcoming WWDVC 2024. Paul Hooper, Chief Enterprise Information Architect at NI (now part of Emerson), brings over two decades of experience to his session, titled 'Driving Business Success through Data Governance.'

"As industry leaders gather for the 10th Annual World Wide Data Vault Consortium (WWDVC), Paul Hooper's keynote session promises attendees actionable insights to enhance their data governance initiatives.", said a DVA spokesperson.

With a focus on practical strategies and best practices, Hooper will delve into crucial components such as establishing ownership, fostering accountability, and cultivating a data-driven culture within organizations.
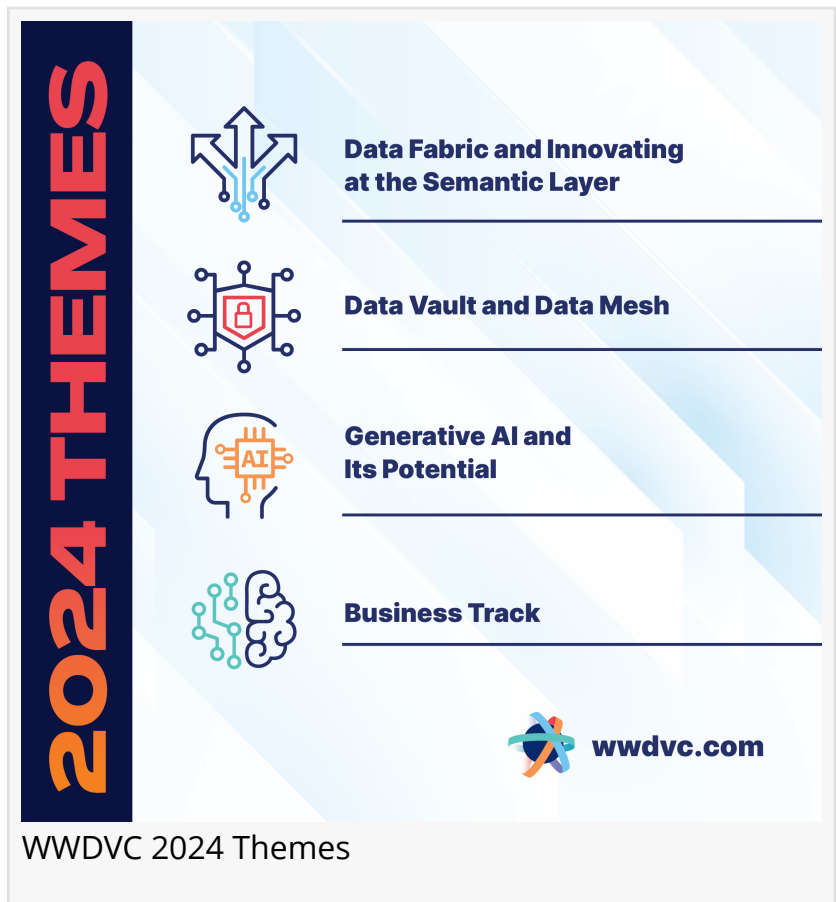

Drawing on his extensive industry experience, Hooper will explore emerging trends like Data Mesh and Generative AI alongside established methodologies such as Data Vault 2.0. Attendees

can expect a comprehensive overview of these concepts, providing a roadmap for navigating the complexities of modern data management.

According to the spokesperson from DVA, "Hooper's session promises to equip participants with the knowledge and tools necessary to drive tangible results and maximize the potential of their data governance initiatives. Attendees can anticipate an enlightening and useful session, covering a range of essential topics including the role of data governance in optimizing organizational performance, strategies for overcoming common challenges, and practical tips for aligning data governance initiatives with broader business objectives."

WWDVC 2024 Themes

Key themes to be addressed during the session include:

> " No other conference brings together DV 2.0 leaders from across the globe to share challenges and success stories, participate in hands-on demos, and engage in unparalleled networking opportunities."
>
> *Randy Benzel*

- The role of data governance in optimizing organizational performance and enabling data-driven decision-making.
- Strategies for overcoming common challenges and pitfalls in data governance implementation, including issues related to data quality, compliance, and organizational culture.
- Emerging trends and technologies shaping the future of data governance, including insights into the integration of Data Mesh and Generative AI.
- Practical tips and best practices for aligning data governance initiatives with broader business objectives

and maximizing ROI.

Paul Hooper's session at the 10th Annual WWDVC conference is of significant importance for attendees looking to strengthen their data governance strategies. With over two decades of experience as Chief Enterprise Information Architect at NI (now part of Emerson), Hooper brings a wealth of knowledge and expertise. His session is tailored to provide attendees with a deeper

understanding of data management complexities and actionable insights to address them effectively.
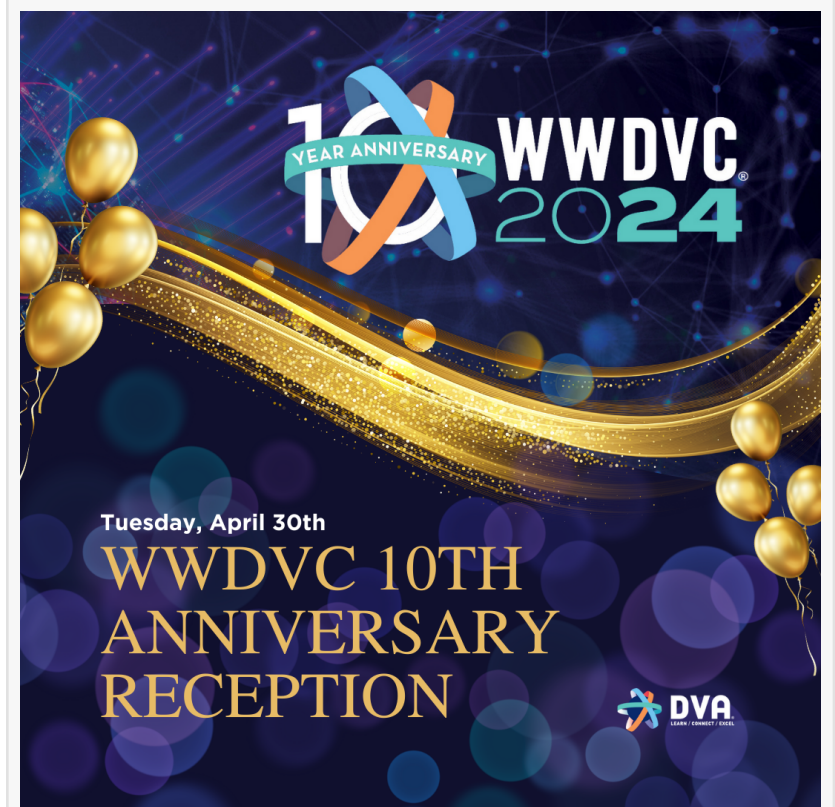

"Attendees can anticipate an insightful session with opportunities for questions and follow-up discussions. By the end of the session, participants will gain actionable insights into how effective data governance drives business success in today's data-driven world" continued the DVA spokesperson.

In addition to Paul Hooper's keynote session, the 10th Annual World Wide Data Vault Consortium (WWDVC) offers a diverse array of sessions and workshops designed to provide attendees with invaluable insights and networking opportunities.

With a focus on data warehousing, analytics, and data management, the conference program promises something for everyone in the data community.

Throughout the event, attendees will have the chance to engage with industry-leading experts and thought leaders, gaining actionable insights and practical knowledge to enhance their data initiatives. Some of the key themes and topics covered in the conference program include:

- Data Fabric and Innovating at the Semantic Layer: Explore the latest trends and advancements in data fabric technology and learn how innovations at the semantic layer are revolutionizing data management practices.
- Data Vault and Data Mesh: Delve into the concepts of Data Vault and Data Mesh, gaining a deeper understanding of their applications and potential synergies for modern data

architectures.⬚
- Generative AI and Its Potential: Discover the transformative power of generative AI and its implications for dynamic data warehousing, taxonomy discovery, and AI-driven business metrics.⬚
- Business Track: Gain insights into data quality, digital transformation leadership, and the role of catalogs, glossaries, taxonomies, and ontologies in driving organizational success.⬚

In addition to the informative sessions, attendees can look forward to engaging hands-on sessions, interactive discussions, and networking events that foster collaboration and knowledge sharing among peers.
