

STP announces the release of its recently updated EHS audit protocol for Jilin, China

VANCOUVER, BRITISH COLUMBIA, CANADA, March 15, 2024 /EINPresswire.com/ -- STP ComplianceEHS (STP) and Specialty Technical Consultants (STC) announce the release of its recently updated EHS protocol for Jilin, China. This audit protocol, which covers relevant national EHS requirements. The regulatory date for the current release is December 2023.

Leading companies around the world use EHS audit protocols to understand the scope of their EHS regulatory obligations and rapidly collect, share, archive, and export audit findings in a cost-effective manner. EHS audit protocols are now also prepared by Antea Group in partnership with STP and continue to focus on those national (plus, in some cases, regional or provincial) EHS requirements that have site-specific applications for manufacturing operations. As a leading EHS management consulting firm with a global network of experienced EHS teaming partners, Antea Group has in-depth knowledge and technical expertise of local/regional EHS requirements.

STP maintains leading-edge EHS audit protocols for more than 50 jurisdictions. The protocol documents are written in English and are available in MS Word, Adobe Acrobat and Excel formats, as well as through STP's web-based portal or can be integrated into an existing company platform. Using the protocols' custom templates and advanced functionality features, auditors can easily track audit findings and manage data over time to improve compliance, risk management and safety performance. In addition, STP's formatting is compatible with leading risk management and sustainability platform providers.

Highlights of selected legislation covered in the newly developed protocol include:

Under the laws of the People's Republic of China, environmental, health and safety (EHS) legislation is hierarchically structured. The National People's Congress (NPC) amends the Constitution (xianfa) and enacts and amends "basic" laws (jiben falü). The Standing Committee of the NPC interprets the Constitution and laws and may exercise the functions of the NPC except amend the Constitution or basic laws that fall within the purview of the full NPC.

Regulations promulgated or approved by the State Council are known generically as administrative regulations (xingzheng fagui). Regulations issued by ministries or other departments of the central government under their own authority are known generically as departmental regulations (bumen guizhang). Regulations are issued under various names: regulations (tiaoli), measures (banfa), administrative or management rules (guize), provisions

(guiding), and detailed rules for implementation (shixing xize), and may be issued in interim form as well as final form. Generally speaking, measures are more narrowly drawn than regulations. Detailed rules for implementation provide guidance on the implementation of statutes or regulations. The State Council and its departments also issue orders (mingling), decrees (ling), directives (zhiling), decisions (jueding), resolutions (jueyi) and instructions (zhishi), as well as interpretations of these measures.
