

# AI Now Drafts Complete Lawsuits

*In a groundbreaking advancement in legal tech, ai.law introduces an AI-powered platform that drafts lawsuits from scratch.*

COLUMBUS, OHIO, USA, March 18, 2024 /EINPresswire.com/ -- In a groundbreaking advancement in legal tech, ai.law introduces an AI-powered platform that drafts lawsuits from scratch.

Ai.law now drafts lawsuit complaints from scratch in a few minutes.

Functioning as an [AI legal assistant](#), ai.law can generate lawsuits from basic factual input from the user. This revolutionary [AI lawyer app](#) technology marks a significant advancement in how legal professionals approach litigation, offering a glimpse into the future of the legal industry.

“

The efficiencies offered by ai.law are measured in thousands of percent.”

*Attorney Troy Doucet*

Unparalleled Efficiency

Ai.law’s goal, through its AI legal assistant, is to speed up the litigation process to make it faster, more efficient, and

lower cost. To that end, the complaint drafting module, a core feature of the ai.law’s [AI lawyer](#) app, drafts a complete lawsuit in as few as two minutes.

With this new AI lawyer software, legal practitioners can now produce complex litigation pleadings in a fraction of the time it traditionally takes. As co-founder and attorney Troy Doucet indicated, “The efficiencies offered by ai.law are measured in thousands of percent.” This leap in efficiency allows attorneys to allocate more time to critical thinking, strategy development, and client relations. It also helps avoid malpractice by providing a comprehensive first draft one might expect from a three- to five-year associate.

Depth and Accuracy

Unique is ai.law’s AI lawyer’s ability to create an entire lawsuit from facts entered from a user. The final product of this module includes formatting, an introductory statement, general allegations, a jurisdictional allegation, counts with claim elements included, and a robust

demand section.

Everything required of a complaint is generated by ai.law's AI legal assistant with remarkable depth and accuracy. Whether the claim is a simple breach of contract or a complex RICO lawsuit, ai.law can recognize the claims and needed supporting elements.

After drafting, ai.law includes a Dismissal Analyzer that scans the lawsuit to identify elements of each claim and then suggests whether each is factually supported. If not supported, ai.law's Dismissal Analyzer indicates what facts might be added to avoid a motion to dismiss for failing to state a claim. Attorney Doucet said, "This software is designed for lawyers who expect quality legal work 100% of the time."

### Flexibility for State or Federal Court

Ai.law's AI lawyer software can pull claims and elements from any jurisdiction in the United States. It formats a lawsuit consistent with the Federal Rules of Civil Procedure because most jurisdictions follow that layout. Formatting may need to be updated if the user's state court rules deviate from the federal format, but the drafted allegations do not vary. This ensures flexibility and applicability across the country.

### Ease of Use

The AI legal assistant platform offered by ai.law requires three simple steps to draft a lawsuit:

1. **Data Entry:** Users start by inputting information into the online platform that includes the names of the parties involved and a chronology of events. The user indicates what claims that they want included. To aid in this process, ai.law offers a Claim Identifier which suggests claims that may have been overlooked.
2. **Document Generation:** Once the basic information is entered, the user clicks a button. The system processes the provided inputs to construct a comprehensive draft of the lawsuit complaint within two to eight minutes, depending on the complexity.
3. **Review and Finalization:** Ai.law provides the draft lawsuit Word format, allowing an attorney to conduct a thorough review and make any necessary edits. This keeps the attorney in control of the final work product and ensures it aligns with their expectations and relevant legal requirements.

### Accurate and Reliable

Ai.law's innovative AI technology was developed with the expertise of a top-rated litigation attorney. The software and AI models that ai.law uses are specifically designed for use by lawyers in practice right away. Ai.law's litigation drafting modules are ready to use out-of-the-

box, while continuously being refined and improved. Ai.law's online AI lawyer app ensures that litigation drafting is accurate and meets the quality one would expect from a top-tier law firm.

## Levelling the Legal Playing Field

Ai.law's technology, through its online website AI lawyer app, democratizes access to high-quality legal resources. Small firms and solo practitioners stand to benefit immensely. They gain the ability to compete with larger entities by leveraging AI to handle routine document drafting quickly. This shift not only promotes a more equitable legal industry but also ensures that more individuals can access justice, regardless of their size or resources.

## A Step Towards a More Accessible Justice System

The introduction of AI in litigation drafting, specifically through ai.law's AI lawyer software, shows the legal industry is quickly changing. Reducing lawsuit drafting time to a few minutes means more clients can be helped with less effort. The benefits for Legal Aid Societies that are strained for resources are obvious. With Legal AI, people will gain access justice like never before.

## Attorneys Stay in Control

Ai.law's platform is designed to support lawyers, not replace them. By automating litigation drafting, ai.law enables lawyers to focus more on strategic aspects of their cases versus spending time on first drafts. Attorneys stay in control over the legal process while enhancing their capacity to serve clients effectively.

## About ai.law

Ai.law is AI that litigates cases with you.™ We are at the forefront of integrating AI technology into litigation to make the process faster, more efficient, and less expensive.
