▯▯▯ ▯▯▯ ▯▯▯▯▯▯▯ ▯▯ ▯▯▯▯▯▯▯▯▯ ▯▯▯▯▯▯▯ ▯▯▯▯▯▯:

Align Technology, Inc., 3M Company, Dentsply Sirona Inc., Carestream Dental LLC, Planmeca Oy, 3Shape A/S, Medit Corp., Dental Wings Inc., Straumann Group, Condor Scan Technologies, Shining 3D Tech Co., Ltd., DentalEZ, Inc., Owandy Radiology, ClaroNav Inc., Acteon Group, Zfx GmbH, Benco Dental Supply Company, GC Corporation, Planmed Oy, Glidewell Dental

Driver: Technological advancements in intraoral scanners

The intraoral scanners and software can be used in the detection and objective monitoring of oral diseases such as caries, tooth wear, or periodontal diseases. Recent technological advancements include caries detection technology, enhanced accuracy of digital impressions, and a decrease in the weight of the scanning wand. For prosthesis fabrication, intraoral scanners enhance the accuracy of an impression and are time efficient with minimal irregularities. In implantology, the intraoral scanners can be used for guided surgery, the creation of custom abutments, or screw-retained crowns, which can be used for the precise placement of implant roots.

South America (Brazil, Argentina, Columbia, etc.)

Middle East and Africa (Saudi Arabia, UAE, Egypt, Nigeria, and South Africa)

🟥🟥🟥🟥🟥🟥🟥🟥🟥 🟥🟥🟥🟥🟥:

North America accounted for the largest market in the Intraoral Scanner market. North America accounted for 38% of the worldwide market value. With a multitude of opportunities arising from the growing adoption of advanced dental technologies and an increasing emphasis on precision in dental procedures, the North American region offers a compelling landscape for the intraoral scanner market. Due to their capacity to transform conventional dental impressions and provide increased accuracy and efficiency, intraoral scanners have become increasingly popular in this area. The increasing need for digital dentistry solutions presents a significant opportunity. The use of digital tools in dental practices has increased dramatically in North America, a region known for leading technological innovation. Intraoral scanners, which give dentists a sophisticated way to take precise, three-dimensional pictures of the oral cavity, are a perfect fit for this trend. This improves in addition to streamlining the diagnostic procedure.
