Lotteries have existed throughout human history from the very beginning. People take part in lotteries as a form of challenge and for the money. The four primary reasons people buy lottery tickets are the desire to win; feeling lucky; curiosity; and enjoyment. According to Forrest et al., the possibility of winning the jackpot was one of the main

factors influencing lottery participation among people.

The rising accessibility of the internet is one of the key factors contributing to the lottery market growth. Moreover, use of devices like tablets, laptops, and smartphones has increased. This has

been an important driver for the market, as lottery systems have become dominant in the recent period. With the rising use of consumer electronics and the demand for smartphones is also expected to rise.

However, in many countries, there are strict rules regarding the lottery. Additionally, several nations have outlawed lotteries. This, in turn, may hamper the lottery market size during the forecast period. For instance, all types of lotteries are prohibited in Iran, Saudi Arabia, and Qatar, to name a few countries. It is up to the states to declare anything legal or illegal in various nations. For instance, only 13 states in India have approved the lottery system. In 15 states and 8 union territories, it is forbidden. The tax imposed by various countries on lottery prices and tickets is high, which is hampering the further growth of the lottery market.

Based on type, the lotto segment held the major market share in 2021, holding nearly one-fourth of the global lottery market share, and is expected to maintain its leadership status during the forecast period. However, the scratch-off instant games segment, is expected to cite the fastest CAGR of 4.3% during the forecast period. The report also contains segments such as quizzes type lottery, numbers game, and others segments.
