

# Kubotek Kosmos Joins prostep ivip

*Company continues focus on engineering data interoperability through further participation in international standards organization*

MARLBOROUGH, MA, USA, March 19, 2024 /EINPresswire.com/ -- [Kubotek Kosmos](#) has been admitted as a member of [prostep ivip](#), a Germany-based international standards organization focused on product data management (PDM) and other digital transformation affecting

manufacturers and suppliers. As a

developer of software technologies that enables practical use of precise 3D models regardless of their native platforms, Kubotek Kosmos is naturally aligned with the goals of this organization which seeks to establish platform-independent standards and practices. The company will be part of Member Group 2/2N.

“

We look forward to collaborating with our association peers from across the globe to advance PDM best practices that provide freedom of choice to businesses working with precise engineering data.”

*Ram Eswaran*

“We have always believed in developing software that gives suppliers and manufacturers the greatest flexibility to work with 3D data from multiple sources. We look forward to collaborating with our association peers from across the globe to advance PDM best practices that provide freedom of choice to businesses working with CAD files and other precise engineering data,” said Ram Eswaran, CTO of Kubotek Kosmos.

In April, prostep ivip will stage its annual Symposium in Munich, where thought-leaders and major OEMs like BMW

Group and Rolls Royce gather to share information on the latest developments affecting the engineering / manufacturing sectors. It will be the first year that Kubotek Kosmos will participate in this event as an exhibitor.

About prostep ivip

The organization is best known for developing the STEP data format (ISO 10303) which provides

a CAD-platform-neutral digital standard for precise 3D data. For more than three decades, it has worked with organizations large and small to develop open, vendor-neutral PDM standards. As the impact of digital transformation reaches throughout the engineering and manufacturing sectors, the organization continues its commitment to developing standards that provide optimal interoperability for organizations at all parts of this continuum.

#### About Kubotek Kosmos

Kubotek Kosmos develops [software technology](#) and end-user products to facilitate the efficient use of precise 3D data across all phases of the engineering and manufacturing process. The company participates in several international standards organizations around core topics such as 3D PDF, LOTAR (Long Term Archiving & Retrieval), and others. Kubotek Kosmos is a trade name of Kubotek USA, Inc., a wholly owned subsidiary of Kubotek Corporation (7709.T Tokyo Stock Exchange), headquartered in Osaka, Japan.
