IoT Testing Global Market Report 2024 – Market Size, Trends, And Global Forecast 2024-2033

The Business Research Company's [“IoT Testing Global Market Report 2024”](#) is a comprehensive source of information that covers every facet of the market. As per TBRC's market forecast, the IoT testing market size is predicted to reach \$5.1 billion in 2028 at a compound annual growth rate (CAGR) of 32.8%.

“

The IoT testing market size has grown exponentially in recent years. It will grow from \$1.21 billion in 2023 to \$1.64 billion in 2024 at a compound annual growth rate (CAGR) of 35.7%.”

*The Business Research
Company*

The growth in the IoT testing market is due to the increased number of mobile connections. Asia-Pacific region is expected to hold the largest IoT testing market share. Major players in the IoT testing market include AT&T Inc., Huawei Technologies Co. Ltd., Siemens AG, Intel Corporation, International Business Machines Corporation, Cisco Systems Inc.

[IoT Testing Market Segments](#)

- By Testing Type: Functional Testing, Usability Testing, Security Testing, Compatibility Testing, Performance Testing, Network Testing
- By Testing Tools: Software Tools, Hardware Tools
- By Applications: Connected Cars, Smart Appliances, Smart Energy Meters, Wearable Devices, Smart Healthcare Devices
- By Geography: The global IoT testing market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.

IoT testing is a way to perform QA testing to verify the IoT device's performance, functionality, and security.

The main types of IoT testing are functional testing, usability testing, security testing, compatibility testing, performance testing, network testing. Functional testing is a type of software testing in which the software system is validated against the functional requirements/specifications. The goal of functional tests is to test each function of a software application by providing appropriate input and comparing the output to the functional requirements. Software tools and hardware tools are used for IoT testing in connected cars, smart appliances, smart energy meters, wearable devices and smart healthcare devices.
