Based on platform type, the desktop-based segment accounted for more than half of the global screen and script writing software market share in 2018, and is anticipated maintain the lion's

share through 2026. Availability of web-based screen and script writing software with more powerful capabilities has fueled their adoption among the end users which, in turn, has driven the segment growth. Simultaneously, the mobile-based segment would portray the fastest CAGR of 16.6% during the forecast period. A number of renowned vendors in the global market are launching software for mobile devices such as smartphones and tablets, which drives the growth of the segment.

Based on deployment mode, the on-premises segment contributed to around three-fifths of the global screen and script writing software market revenue in 2018, and is expected to maintain its dominance by the end of 2026. Surge in adoption of on-premise screen & script writing software by various professionals engaged in writing for television, motion pictures, theaters, video games, and radio drives the segment growth. The cloud-based segment, on the other hand, would grow at the fastest CAGR of 16.1% from 2019 to 2026, owing to the fact that key players of the market are launching cloud-based software with numerous features along with availability of several already existing cloud screen & script writing software in the market.
