WiFiBOX is a shared-type Wi-Fi rental service that can be used in 130+ countries, launched in April 2022 in Tokyo, Japan. WiFiBOX introduces a revolutionary approach to portable Wi-Fi access, since it allows immediate reservation, pickup, and use. Key features of WiFiBOX include:

- Practicality: contactless, quick self-service process from ordering, picking up, to returning
- Instant connectivity: with no complicated settings, the Wi-Fi unit picks up the best cell provider in the area; ensuring seamless connection

- Multi-feature: aside from its long-lasting battery life, the unit doubles as a power bank with multiple charging cables pre-installed.

“We are excited to introduce WiFiBOX to the vibrant area of California. Our innovative self-Wi-Fi rental service is designed to provide convenience, flexibility, and reliability, addressing the evolving connectivity needs of modern lifestyles,” said Masayasu Tamura, CEO of Telecom Square, Inc., the company behind WiFiBOX.

#### Why the USA?

The United States has a reputation as a hub of innovation and technology adoption. With its dynamic market and diverse consumer base, the country provides an ideal environment for WiFiBOX to introduce its revolutionary self-Wi-Fi rental service, catering to the demands of modern lifestyles.

As to why Los Angeles is the first US location for WiFiBOX, Tamura explains, “California owns LAX and SFO, two of the most popular airports in the world for travelers; therefore, we believe it is a great starting point for the development of WiFiBOX in the United States.”

This momentous move signifies WiFiBOX's commitment to enhancing the travel experience by providing seamless connectivity to the world's travelers.
