The antiemetics and antinauseants refer to drugs that are used in the prophylaxis or management of vomiting that results from emetogenic chemotherapy, and for the management of postoperative nausea and vomiting. Antiemetic and antinauseant drugs prevent, control, or treat, nausea and vomiting caused in general or by other medications, frequent motion sickness, infections, stomach flu, or chemotherapy. These drugs reduced the symptoms of nausea or vomiting by blocking signal messages to the part of the brain that controls nausea and vomiting.
