

Cancer Vaccines Market to Witness Upsurge in Growth During the Forecast Period (2023-2032), Examine DelveInsight

DelveInsight's Cancer Vaccines Market report offers an in-depth understanding of the epidemiology and market trends in the 7MM.

NEVADA, LAS VEGAS, UNITED STATES, March 21, 2024 /EINPresswire.com/ -- Some of the key facts of the Cancer Vaccines Market Report:

The Cancer Vaccines market size is anticipated to grow with a significant CAGR during the study period (2019-2032)

In February 2024, A cancer vaccine trial initiated by Moderna commences in the UK, with researchers optimistic about ushering in a new era of treatments.

BCG was approved by the FDA in 1990 as a vaccine for early-stage bladder cancer. It became the standard and most successful treatment of NMIBC

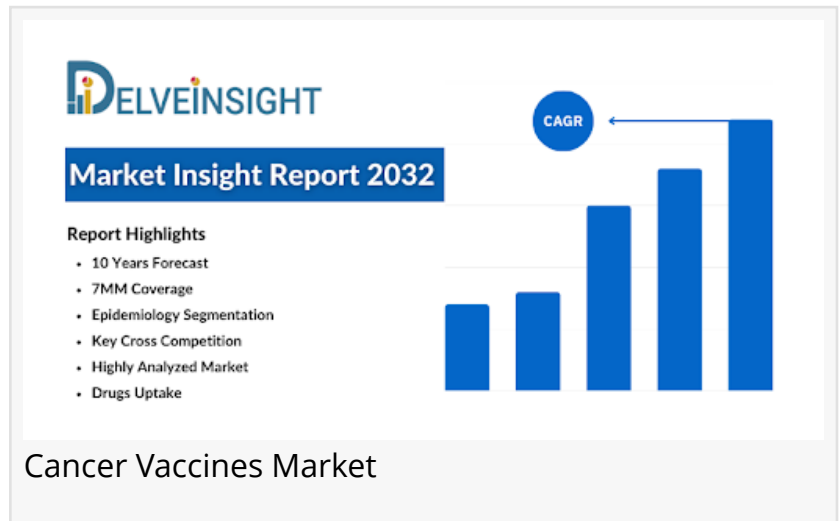

In December 2022, ADSTILADRIN got approved by the US FDA for the treatment of adult patients with high-risk, Bacillus Calmette-Guérin (BCG)-unresponsive non-muscle invasive bladder cancer (NMIBC) with carcinoma in situ (CIS) with or without papillary tumors

Key Cancer Vaccines Companies: GlaxoSmithKline, Merck, Aduro Biotech, AstraZeneca Plc, Dendreon, Astellas Pharma Inc, Sanofi, , Sanpower Group and CSL Ltd., Northwest Biotherapeutics, IO Biotech, Immunomic Therapeutics, Evaxion Biotech, Candel Therapeutics, Aston Sci, Evaxion Biotech, and others

Key Cancer Vaccines Therapies: DCVax-L, IO102-IO103, ITI-1000, EVX-01, CAN-2409, AST-301, EVX-02, and others

Several vaccine constructions have been tested for anticancer therapy. In each case, these vaccines are designed to present tumor-associated peptides integrated with MHC molecules to cognate receptors on B or T lymphocytes and stimulate their activation, maturation, and proliferation

The Cancer Vaccines market is expected to surge due to the disease's increasing prevalence and awareness during the forecast period. Furthermore, launching various multiple-stage Cancer Vaccines pipeline products will significantly revolutionize the Cancer Vaccines market dynamics.

Cancer Vaccines Overview

Vaccines are medicines that help the body fight disease. They can train the immune system to find and destroy harmful germs and cells. There are many vaccines that one receives throughout life to prevent common illnesses. There are also vaccines for cancer that prevent cancer and vaccines that treat cancer. Cancer vaccines are a form of immunotherapy that can help educate the immune system about what cancer cells “look like” so that it can recognize and eliminate them.

Cancer Vaccines Epidemiology

The epidemiology section provides insights into the historical, current, and forecasted epidemiology trends in the seven major countries (7MM) from 2019 to 2032. It helps to recognize the causes of current and forecasted trends by exploring numerous studies and views of key opinion leaders. The epidemiology section also provides a detailed analysis of the diagnosed patient pool and future trends.

Cancer Vaccines Epidemiology Segmentation:

The Cancer Vaccines market report proffers epidemiological analysis for the study period 2019–2032 in the 7MM segmented into:

Total Prevalence of Cancer Vaccines

Prevalent Cases of Cancer Vaccines by severity

Gender-specific Prevalence of Cancer Vaccines

Diagnosed Cases of Episodic and Chronic Cancer Vaccines

Cancer Vaccines Drugs Uptake and Pipeline Development Activities

The drugs uptake section focuses on the rate of uptake of the potential drugs recently launched in the Cancer Vaccines market or expected to get launched during the study period. The analysis covers Cancer Vaccines market uptake by drugs, patient uptake by therapies, and sales of each drug.

Moreover, the therapeutics assessment section helps understand the drugs with the most rapid uptake and the reasons behind the maximal use of the drugs. Additionally, it compares the drugs based on market share.

The report also covers the Cancer Vaccines Pipeline Development Activities. It provides valuable insights about different therapeutic candidates in various stages and the key companies involved in developing targeted therapeutics. It also analyzes recent developments such as collaborations, acquisitions, mergers, licensing patent details, and other information for emerging therapies.

Cancer Vaccines Therapies and Key Companies

DCVax-L: Northwest Biotherapeutics

IO102-IO103: IO Biotech

ITI-1000: Immunomic Therapeutics

EVX-01: Evaxion Biotech

CAN-2409: Candel Therapeutics

AST-301: Aston Sci

EVX-02: Evaxion Biotech

Cancer Vaccines Market Strengths

Advancements in computational and bioinformatics platforms and several other R&D practices enable the development of cancer neoantigen vaccination strategies

Neoantigen-based Personalized Cancer Therapeutic Vaccines like Vigil and Tedopi along with few others can stimulate immune responses to checkpoint inhibitors even in patients that have previously failed conventional treatment regimes, thereby, addressing potential unmet needs of the market

Cancer Vaccines Market Opportunities

Rising incidence of cancer will provide a larger window of opportunity for these novel vaccines
Recurrence is very common in cancers even after proper treatment. This opens up new window for Neoantigen-based Personalized Cancer Therapeutic Vaccines to dominate the treatment regime

Scope of the Cancer Vaccines Market Report

Study Period: 2019–2032

Coverage: 7MM [The United States, EU5 (Germany, France, Italy, Spain, and the United Kingdom), and Japan]

Key Cancer Vaccines Companies: GlaxoSmithKline, Merck, Aduro Biotech, Astrazeneca Plc, Dendreon, Astellas Pharma Inc, Sanofi, Sanpower Group and CSL Ltd., Northwest Biotherapeutics, IO Biotech, Immunomic Therapeutics, Evaxion Biotech, Candel Therapeutics, Aston Sci, Evaxion Biotech, and others

Key Cancer Vaccines Therapies: DCVax-L, IO102-IO103, ITI-1000, EVX-01, CAN-2409, AST-301, EVX-02, and others

Cancer Vaccines Therapeutic Assessment: Cancer Vaccines current marketed and Cancer Vaccines emerging therapies

Cancer Vaccines Market Dynamics: Cancer Vaccines market drivers and Cancer Vaccines market barriers

Competitive Intelligence Analysis: SWOT analysis, PESTLE analysis, Porter's five forces, BCG Matrix, Market entry strategies

Cancer Vaccines Unmet Needs, KOL's views, Analyst's views, Cancer Vaccines Market Access and Reimbursement
