Rise in consumer spending on sports and recreational activities, surge in participation in football-related events, and increase in number of sportswomen drive the growth of the global football sportswear market. However, variations in raw material prices and availability of counterfeit products hinder the market growth. On the

other hand, rise in preference for sports as a career option among youth and ever-increasing popularity of football create new opportunities in the coming years.

According to the football sportswear market trends, on the basis of end user, the men segment is estimated to reach \$66,376.1 million by 2027, at a CAGR of 4.4%. This segment has gained a major share in the global football sportswear market and is expected to sustain its share during the forecast period 2021-2027.

Football sportswear includes shoes, socks, track pants, shirts, and shorts, which are worn by football players and trainers. Growth in participation in football sports, interest of audience for football events, and desires to maintain a sporty look and follow latest fashion trends further drives the football sportswear market growth. Football sports apparel has gained significant traction in the global sportswear market, owing to growth in health awareness and increase in adoption of fitness activities.

On the basis of distribution channel, the brand outlets segment is estimated to reach \$37,616.3 million by 2027, and at a CAGR of 5.6%. Brand outlets are owned and operated by manufacturers. In this, manufactures such as Puma, Adidas, and Nike sell their own brand products through stores. People are increasingly buying products through brand outlets, owing to benefits associated with them such as heavy discounts, cheaper prices, and product availability, which are not available through distribution channels.
