

# Revolutionizing Deposit Return Systems: Aco Recycling Reverse Vending Machines Boost Profitability & Efficiency

*Revolutionizing Deposit Return Systems:  
Aco Recycling Reverse Vending Machines  
Boost Profitability & Operational  
Efficiency*

İZMİR, TÜRKİYE, March 25, 2024

/EINPresswire.com/ -- Aco Recycling, a pioneering force in the development of advanced solutions for deposit return systems (DRS), is thrilled to announce the launch of its new generation of reverse vending machines (RVMs), featuring six main models: K-3, K-3

Trio, C-1, E-1, Aco D-Line, and Aco D-Line Duplici. Each model comes with various sub-models tailored to meet specific market needs, thereby setting a new standard in recycling technology and efficiency.

Designed to enhance the profitability of operators, provide full control for DRS organizations, satisfy end users, and offer invaluable big data for easy operation management, Aco Recycling's RVMs and the v5 platform offer unparalleled comprehensive operation flow and fluidity for all stakeholders in deposit return systems. From robust electronic lock systems ensuring full machine tracking and control to user behavior analytics and health status monitoring, Aco Recycling's solutions redefine the recycling landscape.

Global expertise in DRS, coupled with durable, adaptable, and operator-friendly design, ensures Aco Recycling's RVMs deliver reliable, long-lasting performance while maximizing operational efficiency and brand visibility. The introduction of "ACOGURU," a dedicated team offering continuous support and tailored training, underscores Aco Recycling's commitment to exceptional service and technical support.

The v5 platform stands as the industry's most comprehensive solution for reverse vending machine and deposit return scheme operations, enhancing collection efficiency, providing deeper insights, and optimizing recycling strategies. Founded in 2016 in Turkey by Nihat "Aco" Kuruüzüm, Aco Recycling combines Turkish manufacturing quality with cutting-edge technology to lead the way in the development of solutions for DRS. From pioneering AI recognition technology to innovative barcode recognition systems, Aco Recycling continues to set industry

Deposit Return System, K-3 Reverse Vending Machine

firsts, reflecting a rich tradition of Turkish craftsmanship blended with modern technological advancements.

"Our mission at Aco Recycling is not just to create products but to craft solutions that contribute to a sustainable future," says Nihat "Aco" Kuruüzüm, Founder of Aco Recycling. "With our latest innovations in reverse vending machines and our comprehensive online management and monitoring platforms, we are poised to make a significant impact on the environmental solutions sector, guided by our ethos of innovation, quality, and service."

Aco Recycling invites retailers, supermarket chains, deposit return scheme operators, and waste collection companies to explore the benefits of its new generation reverse vending machines and join the movement towards a more sustainable and efficient recycling future.

#### About Aco Recycling

Founded in 2016 in Turkey, Aco Recycling is at the forefront of developing high-tech solutions and instruments for deposit return systems (DRS). Specializing in reverse vending machines and comprehensive online management and monitoring platforms, Aco Recycling leverages Turkish manufacturing excellence and innovative technology to deliver robust, flexible, and user-friendly recycling solutions globally. With a focus on sustainability and quality, Aco Recycling continues to drive innovation in the recycling industry, contributing to a cleaner, more sustainable future.
