

# SlideFill launches application to create personalized data-driven presentations from Google Sheets and CRM systems

*SlideFill lets users tailor content to specific audiences in three clicks leveraging the power of your customer's data.*

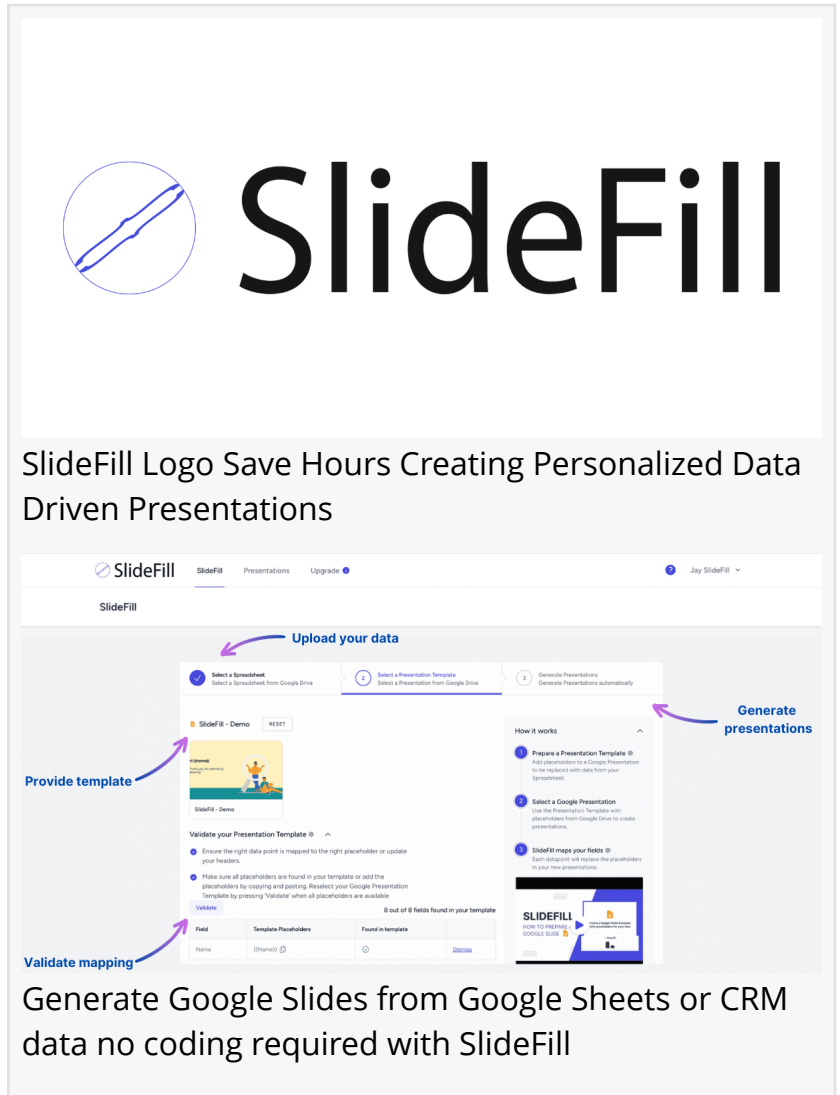

SAN FRANCISCO, CALIFORNIA, UNITED STATES, March 24, 2024

/EINPresswire.com/ -- [SlideFill](#), a B2B SaaS solution for data-driven content, today announced their official launch. With the software, organizations will be able to create personalized, data-driven presentations directly leveraging their prospects and customers' data from Salesforce or Hubspot.

The application ingests data from different sources directly into placeholders in Google Slides, saving organizations time that can be reinvested in revenue generating activities such as client engagement.

"According to McKinsey, 71% of customers expect personalization and companies mastering customization realize 40% more revenue" said Megan Foster, the founder of SlideFill. "Our solution allows sales and marketing teams to create such a personalized experience without investing more time in the preparation of content."

The SlideFill software fully [automates the creation of these personalized presentations](#) leveraging your existing data without storing the data on their servers. All content in the presentations can be edited, allowing businesses to be completely on-brand. Organizations can

SlideFill Logo Save Hours Creating Personalized Data Driven Presentations

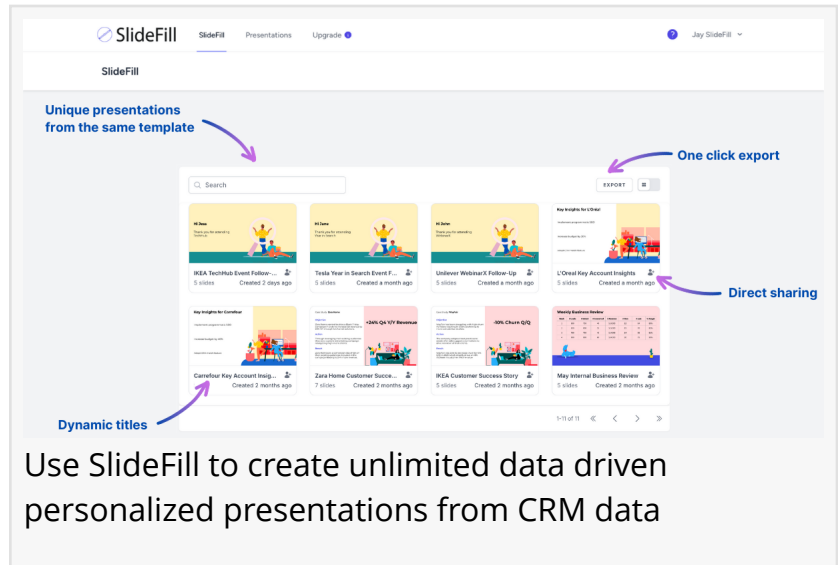

The screenshot shows the SlideFill web application interface. At the top, there's a navigation bar with 'SlideFill', 'SlideFill', 'Presentations', and 'Upgrade'. Below that, a 'SlideFill' header is visible. The main content area is titled 'Upload your data' and is divided into three steps: 1. 'Select a Spreadsheet' (with a sub-step 'Select a Spreadsheet from Google Drive'), 2. 'Select a Presentation Template' (with a sub-step 'Select a Presentation from Google Drive'), and 3. 'Generate Presentations' (with a sub-step 'Generate Presentations automatically'). A 'Generate presentations' button is located to the right of the third step. Below the steps, there's a 'Provide template' section with a 'SlideFill - Demo' card and a 'Validate mapping' section with a table. The table has columns for 'Field', 'Template Placeholders', and 'Found in template'. The 'Validate' section shows '8 out of 8 fields found in your template'. A 'How it works' section on the right lists: 1. 'Prepare a Presentation Template', 2. 'Select a Google Presentation', and 3. 'SlideFill maps your fields'. A 'SLIDEFILL' logo is also visible in the bottom right of the screenshot.

Field	Template Placeholders	Found in template
Name	{Name}	Found

offer their employees their own custom templates with placeholders and SlideFill will fill in the correct data. The app also keeps track of the content created and users can easily share their content with other employees or customers.

“With the rise of Generative AI tools, sales and marketing teams will need to be able to differentiate their content from others. This can be achieved with personalization and data-driven evidence that’s unique to one's

company” said Megan. “This task shouldn’t be as time consuming as it currently is when using manual data entry. Tailored customer success stories, sales pitch decks and marketing content are also proven to be more effective to close deals”.

Use SlideFill to create unlimited data driven personalized presentations from CRM data

SlideFill is currently available as a free and premium software solution. Examples of content that can be automated are sales pitch decks, product marketing collateral, webinar invitations, weekly business reviews, renewal decks and customer success stories.

To celebrate the launch, the company has also published a 155 page ebook “[What is RevOps? Revenue Operations explained](#)” to help freelancers, entrepreneurs and businesses to make their operations more effective by saving cost and increasing revenue.
