wanted to find out more about Jonathan Reilly here's what we found. Jonathan started playing the guitar when he was thirteen years of age. He met the right friend in GCSE school, a drummer, and performed his first session at a studio which consisted of Green Day covers at the age of fifteen.

Jonathan gained an acquired skill and became professional virtually overnight when he was nineteen, which is when he began writing his own music as a solo artist.

In his early twenties, he started laying down tracks at a recording studio that he wrote himself. Using two recording studios, he did thirty seven sessions and laid down around two hundred and seventy tracks, followed by forty sessions mastering CDs, mixing in effects and completing four film shoots.
