

# Going Debuts First-Ever Mobile App

PORTLAND, OREGON, USA, March 26, 2024 /EINPresswire.com/ -- Today, [Going](#), a digital subscription service that sends cheap flight alerts to over 2 million members, announced the release of its [first-ever mobile app](#). Members can now discover those same amazing cheap flight alerts they have been receiving via email for nearly a decade on their phones.

“Two features Going members will love: Globe view and instant notifications,” said Co-Founder and Chief Flight Expert, Scott Keyes. “The globe view, which gives members a picture of the best fares currently available from their airport(s), is a daydreamer’s paradise. When it’s a tough day at work, Going’s app lets members easily explore where they can immediately book their next vacation. Meanwhile, here’s why instant push notifications are a hidden big deal. The best fares—like last week’s \$299 roundtrip Iceland summer mistake fare—can disappear within hours; Going’s app will ensure that members never miss a great flight.”

“

AMAZING APP! Just what I have been needing in my life! My favorite part is the notifications on flight deals. This app changed the game.”

All members—Limited, Premium, and Elite— and non-members can install Going’s mobile application for Apple and Android phones.
