The Vietnam medical nutrition market is poised for significant growth in the upcoming years, driven by an increase in chronic illnesses and the aging population in Vietnam. However, the lack of awareness regarding nutritional issues among Vietnamese individuals is anticipated to impede market expansion in the forecast period. On the contrary, the burgeoning medical tourism industry in Vietnam is forecasted to present lucrative opportunities for market participants.

Regarding product segmentation, the Vietnam medical

nutrition market is divided into infant nutrition, parenteral nutrition, and enteral nutrition. Parenteral nutrition is further classified into dextrose-based, fat-based, additive-based products,

and others. Enteral nutrition is subcategorized into standardized, semi-elemental, and specialized products.
