

MedicusUnion Telemedicine Offering Borderless Healthcare Solutions

A health platform that enables doctors to provide consultation to patients anywhere in the world

LONDON, UNITED KINGDOM, March 27, 2024 /EINPresswire.com/ -- MedicusUnion Telemedicine, the healthcare platform that grants access to Europe's best doctors anywhere in the world, is empowering physicians to impart their medical expertise to expanding populations of patients. MedicusUnion Telemedicine offers doctors a powerful and innovative platform on which to host online video consultations with patients all over the world and receive and transmit encrypted files securely, such as medical records and imaging.

Through this platform, patients are able to gain access to European doctors renowned for their quality and professionalism and work within leading global healthcare systems.

MedicusUnion offers doctors access to their platform at any time from anywhere in the world with unparalleled reliability, as its services are hosted on AWS cloud with a 99.999% uptime guarantee. Their platform utilizes robust encryption to ensure data security, creating a safe environment for the transference of patient data and private information. The mobile app allows for seamless access to appointments, patient records and medical data, so that physicians can manage schedules easily and utilize invaluable tools designed to facilitate growth and optimization in their practice.

The Doctor's Dashboard feature allows doctors to leverage intelligent analytics to better understand patient demographics, online consultation figures, and revenue streams and offers them reports for a comprehensive overview.

Through the DICOM Viewer, doctors can view and interpret medical imaging seamlessly within the platform and ensure that these files are securely shared through the One-Time-Password (OTP) feature that guarantees privacy and confidentiality. Billing also becomes easier to navigate and more flexible, as MedicusUnion provides an efficient portal in which one can create and send digital invoices directly via the doctor dashboard and make payments conveniently without any external effort.

MedicusUnion also allows doctors to conduct GDPR-compliant end-to-end encrypted video calls with their secure meeting feature, MedMeet, through both web and mobile interfaces. This feature allows for screen sharing, so patients can be guided through the results of medical

imaging quickly and easily. MedicusUnion also supports live interpreters during video consultations, providing real-time translation services and enabling seamless interaction between patients and doctors, regardless of their native language.

“MedicusUnion is creating a new paradigm in global healthcare that allows doctors to treat patients without borders,” said Tovmas Khachyan, CEO of MedicusUnion Telemedicine. “Our platform is removing the roadblocks that stand in the way of patients seeking equitable access to the best minds the medical field has to offer, regardless of their nationality, location, or native language.”

MedicusUnion Telemedicine is doing its part to bring about a new era of global healthcare equity. By empowering doctors and experienced specialists across a wide array of medical fields, the global healthcare community is one step closer to the ultimate goal of providing qualitative medical care to everyone in the world. MedicusUnion’s team of highly qualified doctors and specialists are equipped with the most advanced and innovative digital health technologies available today and are leveraging them to provide a modern solution to the issue of healthcare equity facing our world today. With the help of this platform, physicians can now offer their care and expertise to a broader and more diverse patient base than ever before possible.

About MedicusUnion Telemedicine:

MedicusUnion Telemedicine is a platform for creating healthcare without borders. This platform offers European doctors an opportunity to make their medical services available to anyone in the world. These services include online consultation via video call, interpretation during consultations, and a secure exchange of medical data. With MedicusUnion Telemedicine, patients are able to receive competent advice on the treatment and prevention of diseases, regardless of where they are located in the world.
