Recognized Coercive Interrogation Expert Brian Leslie has weighed in on the recent controversy surrounding Russia's interrogation techniques used on terror suspects accused of the murder of 137 concertgoers.

In a statement released [yesterday in an interview with GB News](#), Leslie commented that the footage released by Moscow showing severe injuries on the suspects indicates that enhanced methods were likely used, potentially crossing into the realm of torture. As an expert in coercive interrogation tactics, Leslie emphasized the importance of adhering to international standards and protocols when

questioning individuals suspected of terrorism. He expressed concern over the video release by Moscow showing physical harm being inflicted on detainees, stating that such actions not only violate human rights but also undermine the credibility of any information obtained through coercion. "What concerns me is the motives for Moscow releasing the graphic footage to the media in the first place," says Leslie.
