

AMAX Announces AI Infrastructure Solutions Optimized for Next-Gen NVIDIA Hardware

AMAX, an NVIDIA Elite Partner, announces AI solutions featuring next-gen NVIDIA architecture and liquid-cooling, ready for data center and edge deployment.

FREMONT , CA, USA, March 27, 2024 /EINPresswire.com/ -- [AMAX](#), a leader in AI and HPC IT infrastructure design and solutions, announces the expansion of their GPU solutions portfolio to support the latest NVIDIA®

hardware offerings, presented at NVIDIA GTC 2024. This readiness reflects AMAX's dedication to providing cutting-edge, liquid-cooled, and upgradeable systems, ensuring optimal performance and sustainability in data center environments.

“

Through our elite partnership with NVIDIA, AMAX leverages the latest hardware advancements to accelerate the growth of AI across all industries.”

Bohr-Young Tsao, Senior Vice President of Global Business Development

Bohr-Young Tsao, Senior Vice President of Global Business Development: “Through our elite partnership with NVIDIA, AMAX leverages the latest hardware advancements to accelerate the growth of AI across all industries. Our expertise in advanced liquid-cooling solutions enhances these new technologies, ensuring unmatched efficiency and performance for data center deployments.”

Tackling the Challenges of Generative AI

The rising interest in generative AI has increased the demand for platforms that lower the total cost of ownership (TCO), accelerating the adoption of AI across

diverse sectors. AMAX's GPU solutions, designed to support HPC and AI workloads, tackle the complexities and operational challenges of training and real-time inferencing of large language models (LLMs). With the increasing computational requirements and energy consumption of these models, AMAX's next gen architectures and suite of products provide a comprehensive solution.

AMAX is at the forefront of designing and manufacturing high-density computing solutions that set the standard for operational efficiency, scalability, and performance. Specializing in advanced liquid cooling technologies and upgradeable systems, AMAX ensures that its data center solutions meet the needs of the most demanding computational tasks. AMAX offers on-prem, white-glove implementation services for enterprises, ensuring seamless integration and optimal performance of these advanced computing solutions in their operations.
