Infisign Launches Passwordless Solution for Oracle EBS, PeopleSoft, and Netsuite

Infisign Extends Passwordless Authentication to Leading Enterprise Applications

BRANCHBURG, NJ, USA, March 27, 2024 /EINPresswire.com/ -- Infisign, a leading provider of identity and access management solutions, has announced the launch of its passwordless authentication solution for three major enterprise resource planning (ERP) systems: Oracle EBS, PeopleSoft, and Netsuite. This innovative solution aims to enhance security and streamline user experience for organizations using these popular ERP systems.

Infisign

Infisign's passwordless solution is the first-of-its-kind [Identity and Access Management platform](#) that works on reusable identity concept where a trusted, reusable identity is created right on the user's device that is verified once and shared everywhere and in addition, the user can selectively disclose parts of their identity to share and verify to access applications at any time.

This eliminates the risk of password theft and reduces the burden of password management for users. With the rise of cyber threats and data breaches, this solution offers a more secure and convenient alternative to traditional password-based authentication.

"We are excited to introduce our passwordless solution for Oracle EBS, PeopleSoft, and Netsuite," said Jegan Selvaraj, CEO of Infisign. "This solution not only enhances security for these popular ERP systems but also simplifies the login process for users, improving overall productivity and user experience. We believe this will be a game-changer for organizations looking to strengthen their security posture and streamline their authentication process."

Infisign's passwordless solution is compatible with both on-premises and cloud-based deployments of Oracle EBS, PeopleSoft and Cloud-based Netsuite for organizations of any size. It also integrates seamlessly with existing identity and access management systems, making it easy for organizations to adopt without disrupting their current workflows. This solution is now

available for purchase and can be customized to meet the specific needs of each organization.

With the launch of its passwordless solution for Oracle EBS, PeopleSoft, and Netsuite, Infisign continues to demonstrate its commitment to providing cutting-edge identity and access management solutions to its clients. This solution not only addresses the growing security concerns in the digital landscape but also offers a more user-friendly and efficient way to access critical business systems.
