Increasing Demand for Bioplastic Material and Recyclable Packaging Material Drives the Medical Packaging Films Market

Bioplastics are being used in the market studied to reduce environmental impact. The amount of waste increased dramatically due to the extensive use of plastics in the industry. Thus, using biodegradable plastic in medical applications contributes to environmental protection.

Medical bags are widely used in medical applications, particularly when low-cost packaging in large quantities is required, owing to the primary benefits, such as medical product protection, ease of transportation, and brand promotion. These bags are frequently used to store first aid kits, medications, and medical equipment. Pouches can be used to store tools or liquid medications.

Moreover, packaging film manufacturers are focusing on innovating medical packaging solutions with recyclable materials to achieve greater sustainability in their product offerings. For instance, in November 2021, Coveris, a sustainable packaging solution provider, launched recyclable mono-PE film based on mono films branded Flexopeel T and Formpeel T for medical packaging. The company combined an uncoated Tyvek 1073B from DuPont and a mono-structure film from Coveris, based on PE resins.

June 2022 - Paxxus developed an ultra-high-barrier film to protect sensitive COVID-19 diagnostic devices without aluminum foil. Therefore, devices can be calibrated with an RFID scan before package opening.

May 2022 - Avient introduced new bio-based polymer solutions for medical and pharmaceutical

Geographical Regions: United States, Canada, Mexico, Brazil, Argentina, Colombia, Chile, South Africa, Nigeria, Tunisia, Morocco, Germany, United Kingdom (UK), Netherlands, Spain, Italy, Belgium, Austria, Turkey, Russia, France, Poland, Israel, United Arab Emirates, Qatar, Saudi Arabia, China, Japan, Taiwan, South Korea, Singapore, India, Australia and New Zealand, etc.

Market Segments: Medical Packaging Films, Medical Packaging Films, Medical Packaging Films, Medical Packaging Films, Medical Packaging Films

The Asia Pacific is expected to expand with the highest growth rate in the market studied, majorly due to the increasing middle-class population, disposable incomes, and demand for medical and pharmaceutical products in developing economies such as China, India, Indonesia, and Malaysia. The booming pharmaceutical production in the region is significantly driving the growth of the barrier film market in the region.

The increasing prevalence of kidney disease in Asia necessitated the development of new therapies, including sophisticated devices to improve treatment. The prevalence of kidney disease in Asia is increasing due to increasing rates of diabetes and hypertension. Furthermore, the emphasis on extending the shelf life of medical devices and products and eliminating the possibility of bacterial or viral contamination increased the demand for packaging film in the medical and healthcare industries.

Key Features: Comprehensive information on the product portfolios of the top players in the Medical Packaging Films market.

Key Features: Comprehensive information on the product portfolios of the top players in the Medical Packaging Films market.

Key Features: Detailed insights on upcoming technologies, R&D activities, and product launches in the market.

Key Features: In-depth assessment of the market strategies, geographic and business segments of the leading players in the market.

Key Features: Comprehensive information about emerging markets. This report analyzes the market for various segments across geographies.

Key Features: Exhaustive information about new products, untapped geographies, recent developments, and investments in the Medical Packaging Films market.

Key Features: Comprehensive information on the product portfolios of the top players in the Medical Packaging Films market.
