Prime determinants of growth

Increase in interest of people toward sports and games, growing popularity of spending the day into recreational activities or events, and rise in the number of stadiums drives the growth of the global stadium seating market. However, volatile raw material prices hinder the market growth. On the other hand, breakthroughs in stadium seating technology present new opportunities in the coming years.

The growth of the stadium seating market can be attributed to the growing interest of people toward sports and games. Rise in popularity of spending the day outside of the home premise and into recreational activities or events fuels the market growth of stadium seating market. Furthermore, increase in the number of stadiums being made/established all around the world also drives the growth for stadium seating market. However, increase in threat of security act as the major restraint for the global stadium seating market growth. On the contrary, development of new seating technology is expected to make way for the growth of market in the coming years.
