High-density polyethylene is a plastic polymer with flexible properties. HDPE has high density and is resistant to impact and chemicals, hence it is widely used in healthcare and laboratory environments. HDPE is also used in heavy-duty damp-proof membranes, flexible bags, and films.

The product types of high-density polyethylene are PE 63, PE 80, and PE 100. PE 63 is a medium-pressure piping system, irrigation system, and drinking water connection. The applications are oil and gas pipelines, agricultural irrigation pipes, water supply pipes, sewage system pipes, and other applications. The end-use industries are packaging, building and construction, agriculture, automobiles, and other end-use industries.
