

Chemotherapy Induced Peripheral Neuropathy Market to Witness Growth by 2032, Estimates DelveInsight

CIPN companies -Egetis Therapeutic, Sonnet Biotherapeutic, MakScientific, MediciNova, Asahi Kasei Pharma, EA Pharma, Enveric Biosciences, NeuroBo Pharmaceutical

ALBANY, NEW YORK, UNITED STATES, March 28, 2024 /EINPresswire.com/ -- DelveInsight's "Chemotherapy Induced Peripheral Neuropathy Market Insights, Epidemiology, and Market Forecast-2032" report delivers an in-depth understanding of Chemotherapy Induced Peripheral Neuropathy, historical and forecasted epidemiology as well as the Chemotherapy Induced Peripheral Neuropathy market trends in the United States, EU5 (Germany, Spain, Italy, France, and United Kingdom), and Japan.

The Chemotherapy Induced Peripheral Neuropathy market report provides current treatment practices, emerging drugs, the market share of the individual therapies, and the current and forecasted Chemotherapy Induced Peripheral Neuropathy market size from 2019 to 2032, segmented by seven major markets. The Report also covers current Chemotherapy Induced Peripheral Neuropathy treatment practice/algorithm, market drivers, market barriers, and unmet medical needs to curate the best opportunities and assesses the underlying potential of the Chemotherapy Induced Peripheral Neuropathy market.

Some facts of the Chemotherapy Induced Peripheral Neuropathy Market Report are:

- According to DelveInsight, Chemotherapy Induced Peripheral Neuropathy market is expected to grow at a decent CAGR by 2032.
- Leading Chemotherapy Induced Peripheral Neuropathy companies working in the market are

Egetis Therapeutics, MediciNova, Sonnet Biotherapeutics, MakScientific, MediciNova, Asahi Kasei Pharma Corp., Annji Pharmaceutical, EA Pharma, Aptinyx, Sonnet Biotherapeutics Holdings, Toray, Solasia Pharma, Enveric Biosciences, Regenacy Pharmaceuticals, NeuroBo Pharmaceuticals and others.

- Key Chemotherapy Induced Peripheral Neuropathy Therapies expected to launch in the market are PledOx, Ibudilast, SON 080, AM 1710 and others.
- Among the European countries, Germany had the highest incident population of CIPN with 170,283 cases, and United Kingdom had the incident population of 126,282 in 2020.
- On the other hand, Spain had the lowest incident population of 76,599 in 2020.
- In 2020, the incident population of chemotherapy-induced peripheral neuropathy in Japan was found to be 270,556.
- According to DelveInsight's, the US accounted for the highest incidence cases of CIPN.
- As per DelveInsight's estimates, Japan accounts for approximately 18.11% of the total incident cases in 7MM.

Chemotherapy Induced Peripheral Neuropathy Overview

Chemotherapy-induced peripheral neuropathy (CIPN) is a frequent, dose-dependent complication of anticancer drugs, including platinum, taxanes, epothilones, vinca alkaloids, and newer agents, such as bortezomib. It not only leads to dose reduction or discontinuation of treatment but also decreases the quality of life of cancer survivors. CIPN occurs in ~20% of patients given standard doses of chemotherapy and in almost 100% of patients treated with high doses.

Chemotherapy Induced Peripheral Neuropathy Market

The Chemotherapy Induced Peripheral Neuropathy market outlook of the report helps to build a detailed comprehension of the historical, current, and forecasted Chemotherapy Induced Peripheral Neuropathy market trends by analyzing the impact of current Chemotherapy Induced Peripheral Neuropathy therapies on the market and unmet needs, and drivers, barriers, and demand for better technology.

This segment gives a thorough detail of the Chemotherapy Induced Peripheral Neuropathy market trend of each marketed drug and late-stage pipeline therapy by evaluating their impact based on the annual cost of therapy, inclusion and exclusion criteria, mechanism of action, compliance rate, growing need of the market, increasing patient pool, covered patient segment, expected launch year, competition with other therapies, brand value, their impact on the market and view of the key opinion leaders. The calculated Chemotherapy Induced Peripheral Neuropathy market data are presented with relevant tables and graphs to give a clear view of the market at first sight.

According to DelveInsight, the Chemotherapy Induced Peripheral Neuropathy market in 7MM is

expected to witness a major change in the study period 2019-2032.

Chemotherapy Induced Peripheral Neuropathy Epidemiology

The Chemotherapy Induced Peripheral Neuropathy epidemiology section provides insights into the historical and current Chemotherapy Induced Peripheral Neuropathy patient pool and forecasted trends for seven individual major countries. It helps to recognize the causes of current and forecasted trends by exploring numerous studies and views of key opinion leaders. This part of the Chemotherapy Induced Peripheral Neuropathy market report also provides the diagnosed patient pool, trends, and assumptions.

Explore more about Chemotherapy Induced Peripheral Neuropathy Epidemiology @ [Chemotherapy Induced Peripheral Neuropathy Market Trends and Dynamics](#)

Chemotherapy Induced Peripheral Neuropathy Drugs Uptake

This section focuses on the uptake rate of the potential Chemotherapy Induced Peripheral Neuropathy drugs recently launched in the Chemotherapy Induced Peripheral Neuropathy market or expected to be launched in 2019-2032. The analysis covers the Chemotherapy Induced Peripheral Neuropathy market uptake by drugs, patient uptake by therapies, and sales of each drug.

Chemotherapy Induced Peripheral Neuropathy Drugs Uptake helps in understanding the drugs with the most rapid uptake and the reasons behind the maximal use of new drugs and allows the comparison of the drugs based on Chemotherapy Induced Peripheral Neuropathy market share and size, which again will be useful in investigating factors important in market uptake and in making financial and regulatory decisions.

Chemotherapy Induced Peripheral Neuropathy Pipeline Development Activities

The Chemotherapy Induced Peripheral Neuropathy report provides insights into different therapeutic candidates in Phase II, and Phase III stages. It also analyses Chemotherapy Induced Peripheral Neuropathy key players involved in developing targeted therapeutics.

Chemotherapy Induced Peripheral Neuropathy Therapeutics Assessment

Major key companies are working proactively in the Chemotherapy Induced Peripheral Neuropathy Therapeutics market to develop novel therapies which will drive the Chemotherapy Induced Peripheral Neuropathy treatment markets in the upcoming years are Egetis Therapeutics, MediciNova, Sonnet Biotherapeutics, MakScientific, MediciNova, Asahi Kasei Pharma Corp., Annji Pharmaceutical, EA Pharma, Aptinyx, Sonnet Biotherapeutics Holdings, Toray, Solasia Pharma, Enveric Biosciences, Regency Pharmaceuticals, NeuroBo Pharmaceuticals and others.

Chemotherapy Induced Peripheral Neuropathy Report Key Insights

1. Chemotherapy Induced Peripheral Neuropathy Patient Population
2. Chemotherapy Induced Peripheral Neuropathy Market Size and Trends
3. Key Cross Competition in the Chemotherapy Induced Peripheral Neuropathy Market
4. Chemotherapy Induced Peripheral Neuropathy Market Dynamics (Key Drivers and Barriers)
5. Chemotherapy Induced Peripheral Neuropathy Market Opportunities
6. Chemotherapy Induced Peripheral Neuropathy Therapeutic Approaches
7. Chemotherapy Induced Peripheral Neuropathy Pipeline Analysis
8. Chemotherapy Induced Peripheral Neuropathy Current Treatment Practices/Algorithm
9. Impact of Emerging Therapies on the Chemotherapy Induced Peripheral Neuropathy Market

Table of Contents

1. Key Insights
2. Executive Summary
3. Chemotherapy Induced Peripheral Neuropathy Competitive Intelligence Analysis
4. Chemotherapy Induced Peripheral Neuropathy Market Overview at a Glance
5. Chemotherapy Induced Peripheral Neuropathy Disease Background and Overview
6. Chemotherapy Induced Peripheral Neuropathy Patient Journey
7. Chemotherapy Induced Peripheral Neuropathy Epidemiology and Patient Population
8. Chemotherapy Induced Peripheral Neuropathy Treatment Algorithm, Current Treatment, and Medical Practices
9. Chemotherapy Induced Peripheral Neuropathy Unmet Needs
10. Key Endpoints of Chemotherapy Induced Peripheral Neuropathy Treatment
11. Chemotherapy Induced Peripheral Neuropathy Marketed Products
12. Chemotherapy Induced Peripheral Neuropathy Emerging Therapies
13. Chemotherapy Induced Peripheral Neuropathy Seven Major Market Analysis
14. Attribute Analysis
15. Chemotherapy Induced Peripheral Neuropathy Market Outlook (7 major markets)
16. Chemotherapy Induced Peripheral Neuropathy Access and Reimbursement Overview
17. KOL Views on the Chemotherapy Induced Peripheral Neuropathy Market
18. Chemotherapy Induced Peripheral Neuropathy Market Drivers
19. Chemotherapy Induced Peripheral Neuropathy Market Barriers
20. Appendix
21. DelveInsight Capabilities
22. Disclaimer

About DelveInsight

DelveInsight is a leading Life Science market research and business consulting company recognized for its off-the-shelf syndicated market research reports and customized solutions to firms in the healthcare sector.
