The natural skincare products are used as cosmetic products on human skin and considered safer as compared to synthetic skin care products. Natural skincare products consist of botanical ingredients and are free of synthetic fragrances, dyes, sulfates, and petrochemical ingredients such as phthalates, parabens, petrolatum, and others, unlike regular skincare products.

The main types of natural skin care products include facial care and body care. Natural facial care refers to skin products that are used for cleaning the skin on the face and neck. Facial care products include lotions, serums, face wash and more, made up of natural ingredients. They are characterized based on price range into mass and premium, and they are distributed through direct selling, hypermarket & supermarkets, e-commerce, specialty stores, and others.
