registering a CAGR of 10.5% from 2021 to 2030.

Increase in production of various aircraft models, the growth in the space industry, and surge in use of high-temperature honeycomb sandwich in the space and aircraft industry have boosted the growth of the global high-temperature honeycomb sandwich materials market. However, high production cost and high raw material cost hinder the market growth. On the contrary, rise in commercial aircraft delivery and increase in popularity of LED honeycomb and 3D printing would open new opportunities in the future.
