Definition:

Trade credit insurance is a type of insurance policy that protects businesses against the risk of non-payment by their customers.

Market Trends:

Increasing globalization and complexity in supply chains have led to greater demand for trade credit insurance as businesses seek to mitigate the risks associated with trading internationally and with diverse counterparties.

Market Drivers:

The expansion of global trade and increasing cross-border transactions drive demand for trade credit insurance as businesses seek protection against credit risks associated with trading internationally.

Market Opportunities:

Opportunities exist for trade credit insurers to expand their market presence geographically and across industry sectors. Targeting underserved markets and niche segments can lead to growth opportunities.
