Eye Neoplasm Overview

Eye neoplasms, also known as ocular or intraocular neoplasms, refer to the development of abnormal growths or tumors within the structures of the eye. These tumors can arise from various tissues within the eye, including the retina, iris, ciliary body, choroid, and the surrounding structures.

Eye neoplasms can be benign (non-cancerous) or malignant (cancerous). The most common type of malignant eye tumor in adults is uveal melanoma, while retinoblastoma is the most common malignant eye tumor in children.
