

Comprehensive Car Check History Reports: Includes Stolen Car Check, Car Owner Checks, and More

SmartCarCheck, is a leading UK provider of comprehensive car check history reports

7 BELL YARD, LONDON WC2A 2JR,
UNITED KINGDOM, April 1, 2024
/EINPresswire.com/ -- [SmartCarCheck](https://www.smartcarcheck.com),
a leading UK provider of
comprehensive car check history
reports, is thrilled to announce that
they have revamped their report layout
and added car outstanding finance checks, stolen car checks, and more information.

For smart decisions use Smart Car Check

New Vehicle Data Additions

With over 80% of cars purchased in the UK today being used cars, SmartCarCheck decided to step up their game and provide an even more detailed history of vehicles for car buyers, sellers, and dealerships.

With the [reg check](#) tool, they provide basic and premium vehicle history reports including all of the following car information:

Vehicle check summary: This section gives a full summary of important past records and overall condition of any used car.

Car Outstanding Finance Checks: This section of the report shows information about outstanding finance records and agreements. If a car buyer purchases a car with outstanding finance, they will have to pay off the finance company or risk getting their vehicle repossessed. With this check, car buyers can spot a car that may be repossessed in the future and avoid them.

Stolen checks: Another premium check introduced in the report is stolen checks. This section essentially shows stolen records from MIAFTR and police on the vehicle.

High risk checks: High risk vehicles are vehicles that are closely monitored or tracked to make sure that it doesn't get sold without a good title.

Vehicle Identity Check (VIC test): This section tells if a vehicle has a VIC marker or not. A VIC inspection is carried out on a vehicle to verify if a vehicle was stolen or cloned.

Insurance written off checks: Another premium check offered by SmartCarCheck is the write off check. This check identifies if a vehicle has sustained significant damage in the past and has been written off by an insurance company in the past.

This section also checks if a vehicle has Cat A, B, C/S, D/N, or F write-offs.

Other premium records you can get are:

Auction records: Access detailed auction history, type, seller type, date, location, VIN, overall condition with photos if available

Log book details: Check V5C online, review V5C certificate issuance and changes in ownership.

Previous keepers: The car owner check provides ownership history, transaction dates, and keeper changes.

Plate and color changes: Track alterations in plates and car color over time.

Alerts: exported, scrapped, certificate of destruction issued, imported, vehicle used before registration, imported non EU, previous VRM North Ireland

Scrapped status: Determine if the vehicle is unfit for road use.

Imported status: Confirm if the car was imported, and its origin (EU or non-EU).

Certificate of destruction: Check if a certificate has been issued, indicating irreparable damage.

Check MOT and tax dues

Vehicle Specifications: This section clearly shows the original specifications and equipment of any vehicle. Here, you can find the:

>Year

>Make

>Model

>Trim

>Body style,

>Electric vehicle specifications, and others

SMMT details: SmartCarCheck has also included a section for SMMT details. It contains information provided by the Society of Motor Manufacturers and Traders based on body type and purpose. Here, the reports shows the:

- >Trim
- >Market Sector Code
- >Marque
- >Visibility Date
- >Series, and more

MOT history: The last section shows an overview of the records of a vehicle's Ministry of Transport (MOT) tests, indicating its maintenance history, roadworthiness, and any issues identified during inspections.

For clarity, here is a [sample report](#) you can check showing most of the data included in the report after the recent update.

With more vehicle check history available to the general public, car buyers and sellers can now carry out transactions in the market confidently knowing the history and specifications of any vehicle they come in contact with.

Car History Reports: Now User-Friendly and Easy-to-Comprehend

Car history reports are comprehensive documents that provide vital information about a vehicle's specifications and records including outstanding finance records, previous keepers, MOT history check, mileage readings, and more using the registration number or Vehicle Identification Number (VIN).

As a trusted car check history report provider, SmartCarCheck is dedicated to offering transparent and insightful reports to give buyers and sellers opportunities to make informed decisions.

Recently, SmartCarCheck underwent significant changes to enhance the usability and clarity of its reports. These changes focused on improving the layout to make it more intuitive. Easy-to-read, and comprehensive for car buyers and sellers.

The modifications improved readability, navigation, and created a better user experience for users. With clearer sections, concise summaries, and better formatting, customers can now easily interpret the information presented in the report.

Benefits of Car History Reports

"Car history reports serve as a crucial tool for buyers and sellers, offering peace of mind and confidence in their purchase decisions," remarks Hafsa Anjum, Product Manager of SmartCarCheck. "By providing comprehensive insights into a vehicle's past, our reports empower users to make informed choices and avoid potential car scams."

For Buyers

Car history reports provide valuable insights into a vehicle's past, helping buyers make informed decisions and avoid potential risks. With reports buyers can easily spot fraudulent sellers and dealers and uncover hidden records about any vehicle.

With the new updates in the layout and data contained in the car reports, consumers can have a more detailed view of the vehicle's pasts, damages, outstanding finance, MOT history, mileage discrepancies, fuel consumption, and more.

This way, they can easily spot untaxed car reports, stolen car reports, abandoned car reports, protect their investments, verify a car's true value, and make the right choices.

For Sellers and Dealers

Car check history reports are essential tools for sellers or dealers looking to build trust and credibility with potential buyers. By providing transparent and detailed information about a vehicle's history, sellers can demonstrate the quality and reliability of their vehicles, ultimately increasing buyer confidence and facilitating faster sales.

As the automotive industry continues to evolve, getting access to the right information is paramount. SmartCarCheck remains dedicated to providing top-tier services that prioritize customer satisfaction and enable seamless transactions.

If you are buying a car, ensure to get a detailed report and protect yourself from hidden records and car scams in the UK.

About SmartCarCheck

SmartCarCheck is one of the best providers of comprehensive car check history reports online in the United Kingdom. With their reports, they empower car buyers, sellers, and dealers with accurate and transparent vehicle information, ensuring informed decisions and better transactions.

They cover crucial aspects such as ownership history, MOT history, mileage verification, theft records, written-off checks, outstanding finance, and more. This effectively protects consumers and guides them to making the right choices only.
