#### Definition:

Warehouse as a Service (WaaS) is a type of cloud-based service that provides businesses with on-demand access to warehouse space and logistics services, allowing them to store, manage, and distribute their inventory without the need to own or manage physical warehouse facilities. WaaS providers typically offer a range of services, including storage, order fulfillment, inventory management, and shipping and delivery services. Customers can access these services through a web-based platform or application programming interface (API), enabling them to manage their inventory and track their shipments in real-time.

#### Market Trends:

To improve efficiency and reduce operational costs, WaaS providers are increasingly incorporating automation and robotics technologies into their warehouses.

#### Market Drivers:

The rapid expansion of e-commerce continues to be a primary driver of the WaaS market.

#### Market Opportunities:

WaaS offers businesses the ability to scale their warehousing space up or down quickly in response to changing demand.

#### Market Leaders & Development Strategies

In 2022, CEVA logistics completed acquisition of GEFICO, a worldwide expert in supply chain solution and leader in the automotive logistics. Outcome of this agreement is that CEVA logistics is now the leading global provider of automotive logistics and is the largest France based logistics and warehouse company.
