“

Rise in raw material prices such as maize and corn, as well as the incidence of diseases such as avian flu, are likely to limit the market's growth throughout the projection period.”

Allied Market Research

Meat production and consumption have increased rapidly over the years due to the increased disposable income of consumers and the health benefits offered by meat. In addition, meat is a rich source of proteins, important vitamins, and various other nutrients, such as iron, zinc, B12, and B6. It has been observed that meat consumption in developing economies is higher than the developed regions. The economic growth, changes in lifestyle, population growth, and other structural changes are driving the livestock revolution, hence supplementing the overall growth of the feed premix market.

However, government intervention in the usage of feed premix in every country is expected to restrain the market growth. The premix types used in animal feed are banned in some countries. As a result, the feed manufacturers carry out formula adjustments and make changes in feed processing, which is a time-consuming process. Thus, the implementation of stringent regulations hampers the market growth. Moreover, fluctuations in raw material prices are also

expected to limit market growth.

The feed premix market is segmented into livestock, type, form, and region. Depending on livestock the market is divided into swine, ruminants, poultry, aquatic animals, and others. On the basis of type, the market is segregated into vitamins, minerals, amino acids, and antibiotics. On the basis of form, the market is bifurcated into organic and conventional. Region-wise, the market is analyzed across North America, Europe, Asia-Pacific, and LAMEA. North America accounted for more than 35% share of the total revenue in 2021, followed by Europe and Asia-Pacific.

The report focuses on the feed premix market growth prospects, restraints, and Feed Premix Market Opportunity. The study provides Porter's five forces analysis to understand the impact of various factors such as the competitive intensity of competitors, the bargaining power of suppliers, the threat of substitutes, the threat of new entrants, and the bargaining power of buyers of the feed premix market.

The players operating in the global feed premix market have adopted various developmental strategies to increase their Feed Premix Market Share, gain profitability, and remain competitive in the market. The key players included in the Feed Premix Market Analysis are, DSM, BASF SE, Cargill, Incorporated, Nutreco N.V., InVivo Group, Jubilant Life Sciences, Koninklijke Coöperatie Agrifirm U.A., Phibro Animal Health Corporation, Archer Daniels Midland Company, Agrofeed, and Novus international.
