

U.S. Products Intros Detailing Industry's Most Advanced Spotter; Increases Cleaning Efficiency, Productivity, Revenue

New Cobra Mini 750 Auto Detailing Spotter Combines Mobility, Large Capacity, Two-Stage Vacuum, High-Heat For The Most Powerful Auto Detailing System Available.

VANCOUVER, WA, UNITED STATES, April 4, 2024 /EINPresswire.com/ -- U.S. Products, the leader in commercial Jan-San cleaning extractors, today launched the new Cobra Mini 750 [Auto Detailing Spotter](#) System. The new Cobra Mini 750 is designed for fast cleaning of small areas, upholstery and auto detailing, and is the lightest, fastest-heating, highest capacity auto detailing spotter available on the market.

The new Cobra Mini 750 Spotter is a powerful new system that exceeds the demanding requirements of the Auto Detailing Professional. The Cobra Mini 750 is lightweight, maneuverable, and delivers increased cleaning capability and water recovery via its strong, two-stage vacuum motor.

The Cobra Mini 750 vacuum has a 750-watt heater, and 85-inches of lift to quickly recover water. Its instant high-heat reduces drying time 20 percent over any detailing product on the market. This reduces auto detailing drying time and allows operators to clean and finish more vehicles per day.

The Cobra Mini 750 also has a 55-psi spotter capability and 95-cubic feet per minute (CFM), that will deep clean even the most stubborn auto carpet stains and dirt. The Cobra Mini 750 also includes a large six-gallon capacity that gives detailers the ability to have continuous operation and clean more vehicles in less time.

"Auto Detailers need to clean and extract dirt quickly to get vehicle surfaces spotless and dry. Detailers told us they wanted a powerful, high heat, fast-lift, large-capacity spotter system to help them handle all vehicle cleaning challenges," said Jon Smalley, U.S. Products CEO. "The

New U.S. Products Cobra Mini 750 Auto Detailing Spotter System is a lightweight, maneuverable, and delivers increased cleaning capability and water recovery via its strong, two-stage vacuum motor.

Cobra Mini 750 is the new standard for the auto detailing industry.”

About Auto Detailing Spotters

Auto detailing businesses clean exteriors and interiors of multiple vehicles of all sizes and uses per day. Automotive detailing involves a "detailed" cleaning process, oftentimes accompanied by the restoration and deep cleaning of soiled carpets and upholstery. The detailing business has become a multi-billion-dollar industry. The global auto detailing market was valued at \$33.27 billion in 2022.

Auto Detailers must be able to effectively reach and deep-clean carpets, floor and upholstery crevices in vehicles. Detailing in tight spaces demands a mobile, powerful spotter system to help workers quickly clean and restore these hard-to-reach areas.

Auto Detailing Spotter Systems must be compact, lightweight and portable, with a large liquid capacity for cleaning and extraction.

These spotters must also provide continuous operation so that cleaning crews can deliver touch-free cleaning. A mobile, high-psi, high-heat spotter system uses water pressure to deep clean carpets and hard-to-reach areas. Adjustable spotter systems allow users to scale cleaning to the exact amount of lift needed to deep-clean all surface areas in a vehicle.

“

Auto Detailers need to move fast. The new Cobra Mini 750 high-heat, fast-lift, powerful spotter system allows professional detailers to complete jobs quicker and achieve higher volume and revenue.”
