Based on application, the entertainment segment dominated the overall on-board connectivity

market share in 2017 and is expected to remain dominant during the forecast period, due to increase in IT investment into aviation, maritime, and railways by government organizations and several other companies. Further, connected services provided by market players either through Air to ground or satellite is charged as per the data consumption. Passengers usually consume a significant amount of data on various entertainment elements including Video on Demand (VoD), and Live Television services while travelling.

The ground to air segment dominated the overall on-board connectivity market in 2017 and is expected to remain dominant during the forecast period, due to significant growth and adoption of wireless communication technologies such as 4G LTE and expected launch of 5G are the major factors fueling the market growth. On the contrary, the satellite segment is also expected to grow at a rapid pace throughout the forecast years.
