Depending on the type, the IOL industry is divided into monofocal and premium intraocular lenses. The monofocal intraocular lens segment dominated the market in 2020, and this trend is expected to continue during the forecast period. In addition, monofocal lenses are the choice of many eye doctors and are covered by insurers. However, the advanced intraocular lens segment is expected to witness rapid growth during the forecast period due to its expertise in treating patients with complex retinal disorders and improved visual acuity.

From the end-user perspective, the hospital sector will lead the market in 2021, due to the increase in the number of cataract procedures performed in hospital settings and new medical technologies used in these settings. However, the eye clinic segment is expected to witness significant growth over the forecast period, owing to the increase in the number of low-cost eye clinics, reduction in length of stay, and ease of booking.

The Intraocular Lens Market is expected to witness a significant growth in the coming years. This market has gained interest of the healthcare and medical sectors owing to increased prevalence of hypertension throughout the globe. Furthermore, the global Intraocular Lens Market is segmented on the basis of product type, end user, and region. leading market players have been

introducing various strategies to help enterprises move their on-premise models to on-demand models.
