

Premier Technology Solutions Partner Announces Continued Regional Expansion

SAN DIEGO, CALIFORNIA, UNITED STATES, April 9, 2024

/EINPresswire.com/ -- [Xceptional](#), an award-winning premier technology solutions partner, proudly announces the next phase of its regional expansion strategy with a planned acquisition this year. This will be the company's second acquisition, facilitating further market growth, innovation, and diversification of its portfolio service offerings.

“

Continuing with our regional expansion strategy will enable us to further enhance our capabilities and offerings to our clients.”

Chris McKewon, CEO of Xceptional

After revealing its regional expansion plans in 2021, Xceptional pursued strategic partnerships and acquisitions, resulting in its [first acquisition of managed services provider Altitude Integrations](#) in June 2022. This move facilitated the company's expansion into the Colorado market. Successful integration of the two companies was achieved in early 2023, delivering substantial value to Xceptional's clients and stakeholders through enhanced resources and product offerings. This success prompted the clear decision to start preparations

for a second acquisition.

“We are thrilled to announce our second acquisition in Xceptional's history. This is a significant milestone for our company and a testament to our dedication to providing exceptional technology solutions to our clients, always with a partnership mentality,” said Chris McKewon, Xceptional's CEO. “Continuing with our regional expansion strategy will enable us to further enhance our capabilities and offerings to our clients.”

The company is looking to establish strategic partnerships with other IT managed services, managed security services, and cloud services organizations across multiple states including Texas, Oklahoma, Nevada, Arizona, Ohio, Colorado, Florida, Arkansas, Georgia, North Carolina, South Carolina, Michigan, Pennsylvania, New York, Kansas, Missouri, and Kentucky that offer complimentary services.
