

Blitzer Plumbing Establishes Cleveland Drain Cleaning Cooperative

CLEVELAND, OH — To help local Cleveland area businesses like those along the historic Shaker Square business district offset chronic raw sewage back-ups, Blitzer Plumbing announces the Cleveland Drain Cleaning Cooperative, a new drain cleaning service.

“Overflows hurt Cleveland businesses and our city’s reputation. The Cleveland Drain Cleaning Cooperative isn’t just about fixing clogged drains, it’s about investing in a future where our infrastructure supports our success, rain or shine,” says Doug Blitzer, president of Blitzer Plumbing in Cleveland.

Despite infrastructure improvements like the Northeast Ohio Regional Sewer District’s new Westerly Pump station on the city’s west side at Edgewater, Rains still increase the risk of sewage overflows.

Individual drain clogs contribute to strain on the broader sewer system, increasing the risk of backups during heavy rain or periods of high sewer usage. These backups cause business disruptions and potential environmental contamination.

To help Cleveland business owners mitigate these risks, Blitzer Plumbing has launched the Cleveland Drain Cleaning Cooperative to minimize sewer backups. This initiative focuses on proactive drain maintenance, making it more affordable and accessible for businesses sharing a sewer main. By scheduling professional drain cleaning services collectively, businesses can prevent clogs that contribute to system-wide strain and reduce the risk of costly backups impacting their operations.

Cleveland Drain Cleaning Cooperative

The Cleveland Drain Cleaning Cooperative makes proactive drain cleaning more accessible for businesses. It directly supports the health of the city’s sewer network and complements large-scale initiatives like the Sewer District’s “Project Clean Lake.”

Even with infrastructure upgrades, heavy rains still overwhelm sewers, causing overflows.

Proactive drain cleaning lessens the burden on the system, reducing overflows that contaminate waterways. This cooperative approach empowers businesses to take charge of their drains, preventing clogs with the help of professional drain cleaners, thus protecting the sewer system and contributing to Lake Erie’s cleanliness.

Clogged Drains, Citywide Concerns

The Cleveland Drain Cleaning Cooperative lets Shaker Square businesses relying on older sewer systems share the risks and costs of sewage backups for their businesses. These sewage backups cause financial strain, and operational disruptions due to clean-up, and can even impact reputation due to unpleasant odors. This underscores the importance of preventative drain cleaning, even as broader infrastructure improvements are underway.

The Cleveland Drain Cleaning Cooperative recognizes that regular drain cleaning plays a key role in minimizing those risks for everyone by keeping drains clear and maintaining proper drainage. Businesses can reduce the likelihood of costly backups with the help of professional drain cleaners, which safeguards their own operations and lessens the strain on the larger Cleveland area sewer system.

Cleveland Drain Cleaning Cooperative Pricing

The Cleveland Drain Cleaning Cooperative empowers businesses on the same sewer line to join forces for proactive drain cleaning. This coordinated approach offers significant financial advantages:

Bulk Drain Cleaning Pricing

Instead of each business paying full price for individual drain cleaning, each cooperative negotiates a discounted rate based on the number of participating businesses.

Simplified Drain Cleaning Scheduling

By coordinating with your “sewer line neighbors,” you streamline the drain cleaning process, saving time and potential scheduling conflicts.

Drain Cleaning Pricing Example

Standard Individual Business Cost: \$300

Cost for 4 Businesses in the Cooperative: \$1000 Total (\$250 per business)

This model makes proactive drain maintenance more attainable for businesses, potentially reducing the need for expensive emergency clean-up in the event of a sewer backup.

Benefits of the Cleveland Drain Cleaning Cooperative

The Cleveland Drain Cleaning Cooperative could have broader implications for businesses, the economy, and the environment:

Impact of Clean Drains on Cleveland Businesses

Mitigates the risk of lost revenue and cleanup costs for businesses impacted by sewage backups. Regular drain cleaning, made more accessible by the cooperative, could help businesses minimize costly disruptions.

Economic Ripple Effects of Drain Cleaning

Sewage backups interrupt business operations, leading to lost revenue and costly clean-up like those on Shaker Square. When Cleveland businesses suffer due to infrastructure problems, it has ripple effects, impacting employee wages and reducing local spending power.

The Cleveland Drain Cleaning Cooperative's focus on prevention offers a proactive solution, aiming to reduce backup incidents and contribute to a more stable economic environment in areas historically affected by sewer issues.

Environmental Concerns from Drain Cleaning

Overflows during heavy rains can contaminate waterways, which is a recurring issue noted in local news coverage. By reducing overflow risks, the cooperative indirectly supports cleaner water initiatives and public health.

Although the actual impact would depend on the scale of adoption and long-term results, these are the potential outcomes of widespread participation in the Cleveland Drain Cleaning Cooperative.

About Blitzer Plumbing

Blitzer Plumbing stands as a beacon of excellence in the plumbing industry, with a team of

licensed, experienced plumbing professionals who are deeply committed to delivering top-quality commercial drain cleaning services. Our expertise extends to a comprehensive range of services, including clean drains maintenance, the use of high-grade drain cleaners, and specialized drain cleaning techniques tailored to meet the unique needs of each client. As a premier drain cleaning company, we pride ourselves on our ability to tackle even the most challenging plumbing issues, ensuring that your drains remain free-flowing and clean. Our services are not limited to drain cleaning alone; we also offer exceptional sewer cleaning services, making us a one-stop solution for all your plumbing needs. Our sewer cleaning company division employs the latest in technology and equipment, enabling us to provide efficient and effective cleaning solutions that prevent backups and ensure the smooth operation of your sewer systems.

At Blitzer Plumbing, we understand the importance of keeping your plumbing system in optimal condition. That's why we offer both emergency and routine drain cleaning services designed to minimize downtime and keep your business running smoothly. Our approach combines state-of-the-art equipment with tried and true techniques, ensuring thorough cleaning and long-lasting results that you can depend on.

Whether you're facing an urgent plumbing crisis or looking to maintain the health of your plumbing system, Blitzer Plumbing is here to provide the expertise, services, and peace of mind you need. Trust us to keep your drains and sewers clean, efficient, and fully operational.
