

Arbor Law Announces Expert Legal Counsel and Transactional Support for Clients Operating in the Energy and Infrastructure Sectors

London, England – Arbor Law, a renowned law firm that assists clients in navigating complex regulatory frameworks and achieving their business goals, is happy to announce that its team of specialist energy lawyers will provide expert legal counsel and transactional support to clients operating in the energy and infrastructure sectors.

With a focus on energy law and renewable energy projects, Arbor Law provides a comprehensive range of legal services tailored to address the challenges and opportunities associated with doing business in the energy sector. The top law firm's new legal counsel and transactional support in this area has been designed to deliver specialist advice to help clients understand their legal requirements and ensure strict energy regulations are met.

"From advising on commercial contracts to specialising in energy regulation, we're here to support you with navigating ongoing energy reforms and programmes at both domestic and European levels," said a spokesperson for Arbor Law. Contact us today to see how our team can support the infrastructure of your project and get you closer to Net Zero."

Having been involved in the rollout of the smart metering network, the experienced legal team at Arbor Law can be trusted to navigate clients through energy law, its regulations and oversee a project's infrastructure from a legal perspective.

The energy lawyers at Arbor Law are at the forefront of the energy and technology industry and are committed to leveraging their deep-rooted experience and knowledge of the digitalisation of the energy sector. Considering current innovation in AI-driven solutions and developments in the renewable energy sector, from advice and guidance on data protection, energy agreements and energy policy and regulation, the London law firm additionally offers support with:

Corporate Energy Law: Arbor Law helps clients navigate the challenges and opportunities of their technology in the energy sector by providing specialist corporate advice at every stage of a project to ensure that it complies with energy law regulations.

Intellectual Property: The firm's distinguished legal team can assist with various IP-related contracts in the energy sector, including SaaS agreements, IP licencing and assignments, IP protection, and exploitation and rights clearances.

Arbor Law invites companies to get in touch via phone or the contact form on its website to find out more about how its specialist team of energy lawyers can offer targeted support with delivering energy agreements and digitising infrastructure projects.
