

# U.S. & Canada waste-to-energy market Report 2019-2026 by Regional Revenue, Growth, Trends Analysis & Key Players Ener-Co

WILMINGTON, DE , UNITED STATES, April 10, 2024 /EINPresswire.com/ -- The [U.S. & Canada waste-to-energy market](#) size accounted for revenue of \$1,811.0 million in 2018 and is anticipated to generate \$2,894.0 million by 2026. The U.S. & Canada waste-to-energy market is projected to experience growth at a CAGR of 6.0% from 2019 to 2026.

The U.S. and Canada waste-to-energy market is growing due to surge in demand for renewable sources of energy in these regions, as well as increase in investment by governments to enhance energy production. Further, regulation implemented to reduce carbon content are further anticipated to boost the overall growth of the market. However, high costs associated with plant installation and infrastructure of expensive components are expected to hamper the overall market growth.

U.S. & Canada waste-to-energy market trends such as rapid urbanization and upsurge in the production of various renewable energy sources including biomass and other are expected to boost the growth of the market. The incineration segment was valued at \$859.4 million in 2018 and is projected to reach \$1,380.6 million by 2026, growing at a CAGR of 6.1% from 2019 to 2026. The incineration segment accounted for around half of the thermal technology segment in 2018, owing to the perennial modifications in the market and efficient techniques & process, which are in high demand across the globe. Thus, increase in requirement of high-tech waste-to-energy conversion methods fuels the in U.S. and Canada waste-to-energy market growth.

□□□ □□□ & □□□ □□□□□□□□□□ □□□□□□□□ □□ □□□□ □□□□□□□□:

Waste-to-energy is one of the most effective and robust alternative source of energy, which helps in the reduction of CO2 emissions and thus replace the use of fossil fuels. Using waste as a combustion substance is expected to reduce landfill volumes by more than 90%. For every ton of waste burned, one ton of CO2 emission is reduced, which further helps in eliminating methane, which could be leaked with landfill disposal. This factor is anticipated to increase the demand for U.S. & Canada waste-to-energy market.

## U.S. & Canada Waste-to-Energy Market Report Highlights

### By Technology

Thermal  
Incineration  
Pyrolysis  
Gasification  
Biochemical  
Others  
By Country

U.S.  
Canada

Key market players in the U.S. & Canada waste-to-energy market include:

Wheelabrator Technologies Inc.  
Mitsubishi Heavy Industries  
Covanta Holding Corporation  
Waste Management, Inc.  
Bluefire Renewables  
Babcock & Wilcox Enterprises, Inc.  
Plasco Energy Group, Inc.  
John Wood Group Plc  
Ener-Core, Inc.  
Xcel Energy, Inc.

For more information on this report, contact our sales team at [sales@alliedmarketresearch.com](mailto:sales@alliedmarketresearch.com) or call us at +1 866 611 3027.

The U.S. & Canada waste-to-energy Industry's key market players adopt various strategies such

as product launches, product development, collaboration, partnership, and agreements to influence the market. It includes details about the key players in the market's strengths, product portfolio, market size and share analysis, operational results, and market positioning.

□□□ □□□□□□□□ □□ □□□ □□□□□□:

By type of technology, the biochemical segment is anticipated to grow at highest CAGR of 6.6% during the forecast period, and is anticipated to maintain the same pace.

By country, the U.S. was the largest revenue contributor of the waste-to-energy market in 2018. Canada waste-to-energy market is growing at the highest CAGR of 6.3% during 2019-2026 owing to rise in energy demand and reduction in dependence on fossil fuels.
