*Dual Interface Payment Card Market is Booming and Set to Reach \$37.9 Billion by 2032, Growing at 17.4% CAGR*

NEW CASTLE, DELAWARE, UNITED STATES, April 10, 2024

/EINPresswire.com/ -- According to a new report published by Allied Market Research, titled, "[Dual Interface Payment Card Market](#)," The dual interface payment card market was valued at \$7.8 billion in 2022, and is estimated to reach \$37.9 billion by 2032, growing at a CAGR of 17.4% from 2023 to 2032.

Dual interface payment card provides both contact less and contact-based capabilities to various industries, reducing operational costs, increasing efficiency & accuracy, and improving customer experience. It is made of a kind of smart card with an embedded chip that can enable both contact and contactless transactions. Moreover, contactless capabilities have become increasingly important as businesses strive to streamline their operations and increase productivity. Such dual interface payment card market trends provide lucrative opportunities for the market growth during the forecast period. In addition, dual interface payment cards provide effective payment processing convenience. With the growth of urbanization, there is an increase in demand for intelligent banking systems that can improve the flow of payment systems. As a result, the dual interface payment card market expansion is driven by the need for intelligent and automated payment systems that can process and analyze vast amounts of data in real-time, enabling organizations to make informed decisions and take actions based on data-driven insights.

The plastic segment to maintain its leadership status throughout the forecast period-

Based on type, the plastic segment held the highest market share in 2022, accounting for nearly three-fourths of the global dual interface payment card market revenue, and is estimated to maintain its leadership status throughout the forecast period. Several businesses started to provide eco-friendly plastic cards produced from recycled plastic, from BFSI to manufacturing and healthcare. However, the metal segment would display the highest CAGR of 20.7% from 2023 to 2032. Metal-based cards play a vital role in the dual interface payment card market, and due to their endurance compared to plastic-based cards, metal cards are becoming more popular.

The retail segment to maintain its lead position during the forecast period-

Based on end user, the retail segment accounted for the largest share in 2022, contributing to more than two-fifths of the global dual interface payment card market revenue, and is expected to maintain its lead position during the forecast period. Outdoor dual interface payment card solutions offer a wide range of benefits for the retail industry, including a contactless payment option. These solutions provide detailed and up-to-date payment solutions that help users in the retail sector. However, the hospitality and tourism segment would portray the fastest CAGR of 23.3% from 2023 to 2032. The increased international travel and growing demand for mobile payment options in these sectors are expected to contribute to market growth.

North America region to maintain its dominance by 2032-

Based on region, the North America segment held the highest market share in terms of revenue in 2022, accounting for more than one-third of the global dual interface payment card market revenue. due to the increase in investment in advanced technologies such as cloud-based services, AI, ML, and IoT to improve banking and finance businesses and the customer experience. Thus, it is anticipated to propel the growth of the market. On the other hand, the Asia-Pacific region is expected to maintain its dominance throughout the forecast period. The same region is expected to witness the fastest CAGR of 19.1% from 2023 to 2032, owing to an increase in penetration of digitalization and higher adoption of advanced technology.
