the database development community and to delve into the advancements that are shaping our industry's future.”

J On The Beach, as a platform, aims to showcase and highlight interesting developments in the South of Spain in the field of big data technologies. This initiative helps bring attention to the region's contributions and innovations in the tech industry on a global scale. The conference reflects a commitment to diversity and inclusion within the technology field, with a specific focus on empowering women in the tech community. The agenda is packed with networking opportunities, workshops, and technical sessions designed to foster collaboration and knowledge exchange.

In his presentations, Sean will demonstrate Union Filesystems in containers, showcasing the benefits in capacity and maintaining performance in container environments. He will also delve into the challenges and modernization of databases and data engineering in the Cloud-Native age. Ultimately, the Oracle ACE will explore the concept of Cloud-Native data enlightenment, discussing various milestones and strategies for organizations to adapt, grow, and remain competitive in the evolving landscape of technology and market forces.
