

AB Recycling Enhances Paper and Cardboard Recycling with Eco-Friendly Fire Briquettes from Waxed Cardboard

MELBOURNE, VICTORIA, AUSTRALIA, April 13, 2024 /EINPresswire.com/ -- AB Recycling is proud to announce its latest innovation: a machine that transforms waxed cardboard into eco-friendly fire briquettes. This pioneering initiative enables AB Recycling to turn a traditionally non-recyclable material into a useful, sustainable product, furthering its commitment to environmental stewardship.

The introduction of this machine aligns with AB Recycling's mission to enhance sustainable waste management practices. Typically, waxed cardboard ends up in landfills due to its resistance to standard recycling processes. However, with this new technology, it is now being repurposed into clean-burning briquettes. These briquettes serve as an environmentally friendly alternative to chemical-filled fire starters and are ideal for residential fireplaces, outdoor camping, and barbecues.

Leandro Guisasola, CEO of AB Recycling, expressed enthusiasm about the briquette press: "Our commitment to innovation and sustainability has led us to develop this transformative solution, which not only diverts hard-to-recycle materials from landfills but also supports our vision of a circular economy. We are excited to offer these briquettes as a practical and sustainable option for the community."

AB Recycling encourages local businesses and residents to support sustainability by contributing their waxed cardboard waste and choosing these eco-friendly briquettes for their heating and recreational needs. This initiative is part of AB Recycling's broader strategy to reduce environmental impact and promote recycling innovations.
