

# ESET has been recognized as a Top Player in Radicati Market Quadrant for the fifth consecutive year

DUBAI, UNITED ARAB EMIRATES, April 15, 2024 /EINPresswire.com/ -- [ESET](#), a global leader in digital security, has been named a Top Player in Radicati's APT Protection Market Quadrant 2024, covering the advanced persistent threat (APT) protection segment of the security market.

As stated in the Radicati report, which illustrates how individual vendors fit within specific technology markets at

any given point in time, ESET is ranked among the "current market leaders with products that offer both breadth and depth of functionality, as well as possess a solid vision for the future. Top Players shape the market with their technology and strategic vision."

Among the most appreciated of ESET's key strengths is the unified single-click security management platform [ESET PROTECT](#), which together with ESET Inspect delivers extended detection and response (XDR) with granular visibility, risk assessment, incident response, investigation, and remediation. The platform is available for deployment either in the cloud or on-premises, and it supports all major operating systems, such as Windows, macOS and Linux. The report further highlighted that ESET's solutions offer multilanguage support and a large set of localized versions. Another key area that has contributed to ESET's success is the partnership with Intel, which combines ESET Endpoint Security solutions with Intel® TDT as an additional source of threat telemetry to assist in the detection of threats that use advanced evasion techniques, such as zero-day variants, binary obfuscation, cloaking in a virtual machine, and fileless attacks.

"We are excited to be ranked as a Top Player by Radicati in the APT Protection Market Quadrant for the fifth consecutive time. With this milestone, ESET reaffirms its dedication to the development of cutting-edge security software and our commitment to innovation. We are proud to be recognized for our efforts in making technology safer for all technology users," said Juraj Malcho, ESET's Chief Technology Officer.

APT protection is defined as a “set of integrated solutions for the detection, prevention and possible remediation of zero-day threats and persistent malicious attacks.” Radicati, the renowned market research firm, positions vendors in the quadrant according to two criteria: functionality assessed based on the breadth and depth of features of each vendor’s solution and strategic vision, which refers to the vendor’s strategic direction.

#### About Radicati

The Radicati Group covers all aspects of email, security, social media, instant messaging, information archiving, regulatory compliance, mobile, web services, unified communications, and more. The company provides both quantitative and qualitative information, including detailed market size, installed base and forecast information on a worldwide basis, as well as detailed country breakouts. The Radicati Group advises corporate organizations to assist them in selecting the right products to fit their business needs, and also works with vendors to define the best strategic direction for their products. The Radicati Group also works with investment firms on a worldwide basis to identify and assess new investment opportunities.

#### About ESET

For more than 30 years, ESET® has been developing industry-leading IT security software and services to protect businesses, critical infrastructure and consumers worldwide from increasingly sophisticated digital threats. From endpoint and mobile security to endpoint detection and response, as well as encryption and multifactor authentication, ESET’s high-performing, easy-to-use solutions unobtrusively protect and monitor 24/7, updating defenses in real time to keep users safe and businesses running without interruption. Evolving threats require an evolving IT security company that enables the safe use of technology. This is backed by ESET’s R&D centers worldwide, working in support of our shared future.
