

Greenhouse Heaters Market Hits to Reach \$3.2 bn by 2031, growing at a CAGR of 5.9% | Says AMR

The rise of agriculture business has led to increase in greenhouse farming and increase in demand of greenhouse heaters.

WILMINGTON, DELAWARE, UNITED STATES, April 17, 2024

/EINPresswire.com/ -- The global [greenhouse heaters market](#) generated \$1.8 billion in 2021, and is estimated to reach \$3.2 billion by 2031, witnessing a CAGR of 5.9% from 2022 to 2031. The

report offers a detailed analysis of changing market trends, top segments, key investment pockets, value chains, regional landscape, and competitive scenario. The report is a helpful source of information for leading market players, new entrants, investors, and stakeholders in devising strategies for the future and taking steps to strengthen their position in the market.

“

Based on heater type, the electric segment was the largest revenue generator in 2021.

”

alliedmarketresearch

Greenhouse heaters are used to provide a comfortable environment for plants and extend their life in cold climates. They are devices that maintain a constant temperature without releasing harmful substances to plants. Greenhouse heaters are used in greenhouses to maximize crop productivity or profit. A greenhouse heater is a heating system that can keep a greenhouse at a constant temperature. Some agricultural seedlings and

flowering plants can survive and thrive in all four seasons, provided the greenhouse temperature is kept constant.
