

Implantable Medical Devices Market Expected to Reach \$179.0 Billion by 2030 | CAGR 7.2%

WILMINGTON, DELAWARE, UNITED STATES, April 17, 2024

/EINPresswire.com/ -- [Implantable medical devices market](#) was valued at \$91,868.94 million in 2020, and is estimated to reach \$179.0 Billion by 2030, growing at a CAGR of 7.2% from 2021 to 2030. An implant is a medical device, which is used to replace or support any damaged body organs, improve the functioning of body organs, or treat defects in normal body functions. These can be surgically

implanted either permanently or temporarily in the human body, and can be removed when dispensable. These implantable devices comprise bones, tissues, skin, ceramics, metals, plastics, and other natural materials. Medical implants are used to replace a missing biological structure, support a damaged biological structure, or enhance an existing biological structure.

Implantable Medical Devices Market Report

North America accounted for major share of the global implantable medical devices market share in 2020, and is expected to remain dominant throughout the forecast period. This is attributed to increase in incidences of chronic diseases, surge in demand for implantable medical devices, availability of advanced healthcare facilities with trained medical professionals, rise in number of R&D activities coupled with large presence of key players, and surge in investment made by governments in the healthcare system. However, Asia-Pacific is expected to experience the highest growth rate during the forecast period. Moreover, Japan and China are expected to grow at high CAGR in Asia-Pacific implantable medical devices market majorly due to improvement in healthcare infrastructure, rise in number of hospitals equipped with advanced instruments, development of the R&D sector, upsurge in healthcare reforms, and technological advancements in the field of implants.
