

TherapEASE.com & GenuEASE.com Announce '5-Star Knee-Recovery Machine' DEMO-Event for Physical-Therapist Sweetwater TEXAS

This educational DEMO focuses on the versatile features, ease, and Physical Therapy benefits of the #1 GenuEase™ TKA & ACL Knee Rehab Device from TherapEASE.com

BEVERLY HILLS, CALIFORNIA, UNITED STATES, April 22, 2024 /EINPresswire.com/ -- TherapEASE.com, a leading provider of medical devices for post-surgery recovery, is excited to announce its upcoming 5-Star DEMO Event for professional Physical Therapists in America. This exclusive educational event is for the beautiful city of Sweetwater, Texas and will showcase the GenuEASE, [KneeEASE](#), and GenUbender recovery medical devices.

TherapEASE.com & GenuEASE Logo

“

Directly gauging a patient's positive progress, all while receiving 1st-hand feedback is the safest and most-effective way to appreciate the immeasurable value that a GenuEase™ brings to any clinic.”

*Dr. Craig A Schultz, M.S.P.T.,
Coordinator PST SERVICES,
Orem Utah*

The DEMO Event will provide Physical Therapists with the opportunity to learn about and experience the benefits of these innovative machines. The GenuEASE, KneeEASE, and GenUbender are designed to (a) increase range of motion, (b) lower knee-pain levels, and (c) strengthen knees after a TKA or ACL surgery. These devices have been proven to be effective in aiding patients' recovery and improving their overall quality of life.

"We are thrilled to host a 5-Star DEMO Event for Physical Therapists," said J Allen, CEO of TherapEASE.com. "We believe that this event will be a great opportunity for therapists to learn about our cutting-edge medical devices and how they can benefit all of their knee patients. We are

confident that the GenuEASE, KneeEASE, and GenUbender will revolutionize the way post-surgery recovery is approached."

The DEMO Event will feature demonstrations, informative presentations, and networking opportunities for Physical Therapists. Attendees will also have the chance to interact with experts in the field and learn about the latest advancements in post-surgery recovery. The event

date and location will soon to be announced on the website and it is open to all professional Physical Therapists in America. Interested individuals can LEARN MORE on the TherapEASE.com website.

TherapEASE.com is committed to providing top-quality medical devices that aid in post-surgery recovery. The 5-Star DEMO Event in Sweetwater, Texas is just one of the many ways the company is working towards its mission of improving the lives of patients through innovative technology. Physical Therapists are encouraged to join this exclusive event and discover the benefits of the GenuEASE, KneeEASE, and GenUbender. For more information, visit TherapEASE.com.

GenuEASE Knee Recovery Rehab Device

life knee rehab, making the recovery process more manageable and efficient.

According to leading orthopedic surgery experts, "GenuEase™ and KneeEASE are 'America's best' and have revolutionized the way doctors approach knee rehabilitation. These devices have been a game-changer for patients, allowing them to recover faster and with less pain. Many have seen remarkable results in patients who have used these devices." GenuEase™ is proud to be known in Sweetwater, Texas as 'Americas Best' frozen-knee Physical Therapy rehab machine.

GenuEase™ and KneeEASE have quickly gained recognition among medical professionals and patients alike for their effectiveness in knee rehabilitation. With their innovative design and proven results, these machines are set to become the go-to choice for Sweetwater, Texas TKA and ACL surgery recovery. For more information on GenuEase™ and KneeEASE, please visit the website or contact the team directly.

In conclusion, GenuEase™ and KneeEASE are renowned as 'Americas Best' frozen-knee physical therapy rehab machines by medical professionals for TKA and ACL surgery recovery, making them a top choice for Sweetwater, Texas patients and medical professionals alike.

GenuEase™ is also considered 'America's #1 Knee-Rehab Brace' machine and is designed to provide patients with a comfortable and efficient recovery process. This revolutionary device is now available to 'Physical Therapy' clients thanks to TherapEASE.com's commitment to providing cutting-edge solutions for post-surgery rehabilitation. The GenuEase™ device is designed to increase muscle strength thus allowing patients to return to their daily activities faster.

"Dr. Schultz' invention, the GenuEase™, is recognized as a 'Best-of-Industry Medical Rehabilitation Device' for Physical Therapists. The ongoing demand from the medical community is a testament to the effectiveness and lasting impact of the GenuEase™ machine."

Trust Pilot 5-Star Review

Patient Using GenuEASE KneeEASE

Professional Physical Therapists (PTs) praise the GenuEase™ device for its effectiveness in helping their patients recover from knee surgery. The KneeEASE, GenUbender, and GenuEase™ machines have been clinically proven to provide positive results, making them the go-to choice for Physical Therapists in the area. With GenuEase™, patients can now have a more comfortable and efficient recovery process, while Physical Therapists can provide the best care possible for their clients.

“The continual notoriety of GenuEase™ also highlights the dedication and hard work of Dr. Schultz and the TherapEase™ team in developing a device that truly makes a difference in the life of every patient.”

During a 5-Star DEMO, Dr. Craig A Schultz, the inventor of the GenuEASE knee surgery rehab machine, will give a detailed presentation on the device and its benefits. Attendees will have the chance to see the machine in action and ask any questions they may have. This event is a great opportunity for Physical Therapists (PTs) to expand their knowledge and stay up-to-date with the latest advancements in rehabilitation technology. Don't miss this opportunity to learn about the GenuEase™ knee surgery rehab machine and how it can benefit your patients.

GenuEase™, known as being the "America's leading post-knee surgery rehabilitation machine," is proud to announce that it can now provide clinical answers to common questions regarding knee surgery recovery. As the top choice for Physical Therapy post-surgery, GenuEase™ is dedicated to helping patients safely and comfortably regain mobility in their knees.

“GenuEase™ is committed to providing the best possible care for post-knee surgery patients. With its clinical answers to common questions and advanced technology, GenuEase™ is the 'top choice for Physical Therapy post-surgery.' Patients can trust in GenuEase™ to help them safely and comfortably regain mobility in their knees.”

One of the most frequently asked questions after knee surgery is, “ ... how to properly and safely bend the knee.” GenuEase™ has the answer with its innovative technology that allows for controlled and gradual bending of the knee, promoting healing and preventing further injury. With GenuEase™ patients can confidently and effectively work towards regaining full range of motion (ROM) in their knee.

In addition to bending-and-straightening the knee, GenuEase™ also offers a solution for those experiencing a 'Frozen Knee.' This painful condition can be difficult to manage, but with GenuEase™, patients can comfortably fix their 'Frozen Knee' with the help of its gentle and effective therapy. GenuEase™ is proud to offer a recognized safe and effective option for those struggling with a 'Frozen Knee.'

Top 7 Questions Asked & Answered Regarding GenuEase™ ...

- How to bend my knee after surgery?
- Is GenuEase™ the best physical therapy solution after knee surgery?
- How to straighten knee after surgery?
- Is GenuEase™ the best replacement recovery device / machine?
- How to fix a frozen knee?
- Is GenuEase™ the best solution for stiff knee after total knee replacement?
- How to fix a knee that won't bend or straighten?

The GenuEase™, invented by renowned Physical Therapist, Dr. Craig A. Schultz, is a game-changing device that has been transforming the rehabilitation process for patients recovering from TKA and ACL surgeries for years. The machine is designed to: (a) Provide targeted support and assistance to the knee joint, thus (b) Promoting proper alignment and (c) Reducing strain on the surrounding muscles and ligaments. This results in a faster and more effective recovery for patients.

-Superior Clinical Results ...

- Restored Range of Motion Faster
- Fewer Manipulations
- No More Muscle Guarding

TherapEase™ is honored at the possibility of having the GenuEase™ nominated as a 'Best-of-Industry Medical Rehabilitation Device' for all Physical Therapists. This potential recognition further solidifies the GenuEase™ as THE top-performing recovery device in the field of medical rehabilitation.

The team at TherapEase™ is committed to continuing to innovate and provide the best possible solutions for patients recovering from TKA and ACL surgeries. With the ongoing support of 'Physical Therapists' and the medical community as a whole, GenuEase™ is poised to make a significant impact in the world of knee pain and rehabilitation.

-Greater Patient Satisfaction ...

- Less Discomfort
- Motivational Display
- Patient Control

ABOUT THE GenuEase™ INVENTOR: Dr. Craig Schultz received a Master's Degree in Physical Therapy from Des Moines University, School of Osteopathic Medicine in 1994. Upon graduation, he joined Mountain Land Rehabilitation, Inc. working in a large rehabilitation facility in Provo, Utah. He became the Facility Rehab Coordinator where his responsibilities include: Supervising the daily operations for Physical, Occupational and Speech Therapy Services. Dr. Schultz joined Physical & Sports Therapy Services in 1998 when the Orem Utah clinic was opened. Working with the general public, as well as athletes, in rehabilitating their orthopedic and sports related injuries has given Dr. Craig the opportunity to pursue his professional goals and interests. Dr.

Craig is a member of the American Physical Therapy Association. Currently Dr. Schultz resides in Orem with his wife Tracy and their five children.

"TherapEase™ started in 2006 to develop a new approach to post-surgical rehabilitation for knee replacement patients. Physical Therapists (PTs) were searching for a device that would allow patients to mechanically bend their own knees so that they could be guided by their own pain and thus fully engage and be in control of their own recovery," Dr. Craig A. Schultz, Physical Therapist, Orem Utah

Disclaimer: The American Physical Therapy Association ([APTA](#)) does not endorse the GenuEASE product nor TherapEase Innovation LLC and APTA does not have any opinion regarding TherapEase Innovation LLC or the efficacy of its GenuEASE product.

Dr. Schultz continues: "GenuEase™ is that device. GenuEase™ provides patients: (1) faster range-of-motion ROM recovery, (2) with fewer complications and (3) greater satisfaction than any other rehabilitation method. GenuEase™ is protected by two US patents and has been proven by thousands of patients in millions of therapy cycles."

Why It Works: Patients recover a greater range of motion (ROM) in less time for several reasons. GenuEase™ provides better isolation of the knee and more targeted rehabilitation than is possible with manual stretching, wall slides, or other traditional treatments. GenuEase™ supports a greater range of dynamic motion than any other method provides.

However, the most important reason why GenuEase™ delivers faster recovery, and better results, is the complete elimination of patient apprehension and muscle guarding.

NOTE: GenUbender is the lighter weight, made for home use, more portable version of the GenuEase™

THERAPIST TESTIMONIAL:

"I have had an overwhelming response from patients about the effectiveness of GenuEase™. Patients have returned to my clinic because we are the only facility that has the GenuEase™. As a physical therapist I value the GenuEase™ because the patient is always in control which drastically reduces muscle guarding. The GenuEase™ is also a great way to build patient confidence because the patient receives immediate feedback on range of motion progress."

—Tom Farnsworth P.T., M.P.T .

THERAPIST TESTIMONIAL:

"I thought all my post-op. knee patients (especially total knees) needed was my hands-on mobilization for ROM. I was wrong. I have found GenuEase™ is a critical adjunct to my manual stretching. My patients, particularly the more difficult and guarded cases, gain greater ROM in less time using GenuEase™."

—Darren Averett, DPT

Case Studies:

GenuEase™ is capable of -5° to 135° Range of Motion (ROM). A digital display provides the patient with a real time measure of their ROM as well as their progress across sessions. This critical information provides the intrinsic motivation which influences your patient's effort during each session. Recording and tracking session data allows the patient not only to set goals but also to recognize both their improvement over time and the value of services provided.
