

SpinePoint Medical Unveils Innovative Spinal Implant Solutions

SpinePoint Medical is a leading innovator in spine surgery technology, dedicated to transforming the standard of care for patients with spinal disorders.

RENO, NV, UNITED STATES, April 17,

2024 /EINPresswire.com/ -- SpinePoint Medical, a leading innovator in [spine](#) surgery technology, is proud to announce the upcoming launch of its groundbreaking solution aimed at revolutionizing spine care. With a commitment to advancing surgical techniques and improving patient outcomes, SpinePoint introduces a transformative approach that promises to redefine the standards of spinal surgery.

“

At SpinePoint, we solving patients for surgeons with solutions created by surgeons for better patient outcomes.”

Lali Sekhon

Anticipated to hit the market in 2025, SpinePoint's innovative solution will have its first device received FDA approval in mid-2024, marking a significant milestone in the company's journey to bring cutting-edge technology to the field of spinal care. This achievement underscores SpinePoint's dedication to meeting the highest standards of safety, efficacy, and quality in its pursuit of improving

patient outcomes.

Spine disorders and injuries affect millions of people worldwide, often causing debilitating pain and restricting mobility. Traditional spine surgeries have posed challenges, with successful surgeries leading to implant failures and revision surgeries. Addressing these concerns, SpinePoint has developed a cutting-edge system designed to give optimal surgical outcomes with reduced revision surgery and better patient outcomes.

The cornerstone of SpinePoint's innovation lies in its proprietary technology, which, from an interbody perspective, will produce the lowest stiffness cages on the market. Using a patented 'z' shape, the devices allow microcushioning to reduce subsidence and adjacent level stresses. This will ultimately lead to better surgical outcomes and reduced patient recovery times.

"At SpinePoint, we are driven by a passion for improving the lives of patients suffering from spinal conditions," said Dr. Lali Sekhon, Founder and Chief Medical Officer of SpinePoint Medical.

"Our innovative approach combines state-of-the-art technology with surgical expertise to empower surgeons to solve the problems surgeons see with devices currently on the market and transform the landscape of spine care."

The leadership team guiding SpinePoint's mission comprises individuals with extensive expertise in healthcare, innovation, and business. The board of directors includes:

- Robert Weakley: Chief Executive Officer
- Mark Ojeda: Vice President
- Jodie Patton, MHA, MBA: Advisor to the Board
- Dr. Lali Sekhon, MD, PhD, MBA: Chief Medical Officer
- Max Painer, IMBA: Advisor to the Board
- Mike Isaacson: Advisor to the Board

The first product to market will be the lowest stiffness cervical [cage](#) available, representing a significant advancement in spinal implant technology. This innovative device offers unprecedented flexibility and support, allowing for optimal fusion and stability in cervical spine surgeries.

Following the introduction of the cervical cage, SpinePoint plans to release seven additional products utilizing the same patented 'Z' shape design. This unique design enables a spring-like action that accommodates the natural movements of the entire spine, regardless of the surgical approach. By harnessing the biomechanics of the spine, these innovative implants promise to enhance patient outcomes and revolutionize the standard of care for spinal surgeries.

In the pipeline is also a revolutionary pedicle screw that can go around corners, allowing for unparalleled construct properties when compared to conventional techniques.

As SpinePoint continues to pioneer advancements in spine surgery technology, the company remains committed to collaboration with healthcare professionals and institutions to ensure widespread access to its innovative solutions. Through ongoing research and development efforts, SpinePoint aims to further enhance its platform and expand its impact on the field of spinal care.

SpinePoint is currently seeking \$8.5M Series A funding to complete the commercialization goals. Enquiries to sekhon@spinepointusa.com
